# MINT **ERROR** NEWS<sup>TM</sup> MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our fifth year bringing you both a print magazine and an online PDF magazine. There are now over 450 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Minterrornews.com has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mint Error News was originally sponsored by Mike Byers and ANACS. Due to the popularity of mint errors and the magazine it is now sponsored by Mike Byers and several other mint error dealers including Allan Levy (alscoins.com) and Fred Weinberg (fredweinberg.com). Mike Byers is the Publisher and Editor of Mint Error News Magazine.

# Washington Dollar Mint Error Special Section

*Editor's note: The Washington Dollar Missing Edge Lettering is one of the most exciting mint errors to surface in the last ten years. This following section contains information on this new release from the U.S. Mint and the new mint errors that have been discovered as well as articles informing the collector on what to look out for. There may be some repetition in content, but we at Mint Error News feel it is very important information that our readers should know.*

Beginning in 2007, the U.S. Mint released the first in a series of commemorative dollar coins featuring the presidents of the United States. Hoping to help dollar coins circulate more commonly than recent predecessors, the Sacagawea, Susan B. Anthony, and Eisenhower dollars, each coin is to be minted for a short time period and feature a different American president. The Mint will issue four of these Presidential Dollars each year, approximately one every 13 weeks.

These coins will feature edge-incused inscriptions with the year of issue, mint mark, "E Pluribus Unum" and "In God We Trust." This marks the first time an American coin has had design elements on the edge since the last \$20 Gold Double Eagles were struck in

1933. The size, weight and metal composition of these new Presidential \$1 Coin will be identical to that of the Sacagawea Golden Dollar. Each issue will share a common reverse design featuring the Statue of Liberty.

## Specifications:

Weight: 0.286 oz. (8.1g)

Diameter: 1.043 in. (26.5mm)

Thickness: 0.0787 in. (2.0mm)

Edge: "In God We Trust," "E Pluribus Unum," and the year of issue

Composition: 88.5% Copper, 6% Zinc, 3.5% Manganese, 2% Nickel

# Washington Dollar Mint Error Special Section

Four Presidential Dollars will be released each year, following this schedule:

Year	President	Years Served
2007		
1	George Washington	1789-1797
2	John Adams	1797-1801
3	Thomas Jefferson	1801-1809
4	James Madison	1809-1817
2008		
5	James Monroe	1817-1825
6	John Quincy Adams	1825-1829
7	Andrew Jackson	1829-1837
8	Martin Van Buren	1837-1841
2009		
9	William Henry Harrison	1841
10	John Tyler	1841-1845
11	James K. Polk	1845-1849
12	Zachary Taylor	1849-1850
2010		
13	Millard Fillmore	1850-1853
14	Franklin Pierce	1853-1857
15	James Buchanan	1857-1861
16	Abraham Lincoln	1861-1865
2011		
17	Andrew Johnson	1865-1869
18	Ulysses S. Grant	1869-1877
19	Rutherford B. Hayes	1877-1881
20	James A. Garfield	1881

2012		
21	Chester A. Arthur	1881-1885
22	Grover Cleveland	1885-1889
23	Benjamin Harrison	1889-1893
24	Grover Cleveland	1893-1897
2013		
25	William McKinley	1897-1901
26	Theodore Roosevelt	1901-1909
27	William Howard Taft	1909-1913
28	Woodrow Wilson	1913-1921
2014		
29	Warren Harding	1921-1923
30	Calvin Coolidge	1923-1929
31	Herbert Hoover	1929-1933
32	Franklin D. Roosevelt	1933-1945
2015		
33	Harry S. Truman	1945-1953
34	Dwight D. Eisenhower	1953-1961
35	John F. Kennedy	1961-1963
36	Lyndon B. Johnson	1963-1969
2016		
37	Richard M. Nixon	1969-1974
38	Gerald R. Ford	1974-1977
40	Ronald Reagan	1981-1989

Note: Only deceased presidents will be honored on Presidential Dollars

## Inside Minting:

# 2007 George Washington Dollar Missing Edge Lettering and Other Errors

by David J. Camire (ngccoin.com)

First, some overview: The new Presidential Dollar Coins were officially released on February 15th of this year. They are being minted at both the Philadelphia and Denver mints. The planchets used to make the new dollar coins are of the same composition (a three-layer clad composition), weight (8.1 grams), diameter (26.5 mm), and thickness (2mm) as the Sacagawea “Golden” Dollar. Where the coins differ most significantly, apart from the obvious obverse and reverse design difference, is the edge. On the Presidential Dollar, some of the requisite legends have been moved to the edge of the coin (Photo 1a and 1b).

1b.) 2007 P George Washington Presidential \$1 coin reverse showing edge lettering

1a.) 2007 P George Washington Presidential \$1 coin obverse showing edge lettering

The presidential coins are edge-lettered, with the date and mintmark (photo 1c), as well as the mottos E PLURIBUS UNUM, and IN GOD WE TRUST. The lettering is applied after the coins are struck in a separate process, and the edge lettering is attracting a lot of interest.

Struck coins are fed into an edge-lettering machine randomly, and thus the orientation of the edge lettering is also random. These coins can be found with the edge lettering that can be read either from looking at the edge holding the coin with the obverse facing up or

# Washington Dollar Mint Error Special Section

1c.) Close-up image of edge lettering showing the date and mintmark

reverse facing up (Photo 1d). This variation in obverse lettering is a necessary and intended part of the minting process, and, unlike coins struck with a lettered edge collar, there is no significance to the orientation and placement of the lettering.

1d.) Two 2007 P George Washington \$1 coins showing opposite edge lettering orientation. Coin A shows lettering which can be read with the obverse facing up, while coin B shows edge lettering which can be read with the obverse facing down.

What if the coins were to inadvertently bypass or miss the edge-lettering stage of the minting process? The resulting coins would simply have a plain edge, the same as a Sacagawea dollar (Photo 2a). This does pose an interesting problem. The coins are not only missing the mottos E PLURIBUS UNUM and IN GOD WE TRUST; they are also missing the date and mintmark. (Photo 2b) Washington dollar coins missing the edge lettering are being found in rolls minted at both the Denver and Philadelphia Mints.

2a.) A George Washington Presidential \$1 coin missing edge lettering

2b.) Close-up of the edge of a George Washington Presidential \$1 coin missing edge lettering

Aside from missing the edge lettering, other edge letter anomalies are being discovered, including partial and multiple edge lettering.

# Washington Dollar Mint Error Special Section

For example, this 2007 P Washington Dollar is missing the words E PLURIBUS UNUM (Photo 3a). The coin apparently became partially jammed (note the two edge marks Photo 3b, 3c) before exiting the machine, resulting in only a partial design transfer. NGC will certify and attribute partial and fully missing edge lettering as well as multiple edge lettering. All coins will be encapsulated in the NGC state-of-the-art coin EdgeView Holder™ so that the edge error will be visible.

3a.)

3b.)

3c.)

NGC will also grade and authenticate other Presidential dollar errors such as blanks and planchets (both plain-edge and with edge lettering), die adjustment strikes, broadstrikes, off-centers, multiple strikes, coins missing clad layer(s), coins struck on wrong planchets, and major clashed dies, etc. NGC will not attribute minor errors such as die cracks (Photo 4c), die chips, minor struck throughs (Photo 4b), minor clashed dies, minor die damage (Photo 4a), starburst effects, die polishing, etc.

4c.) Small die cracks, as shown, are not considered mint errors on circulating coinage, and are not recognized on the certification label by NGC.

4b.) A coin with a small area struck through grease, as shown, is not significant enough to be considered a mint error and is not noted on the holder by NGC. Recognized struck throughs are struck through foreign material and/or missing major design elements.

4a.) Minor die damage visible near Liberty's neck, as shown, is not significant enough to be considered a mint error and is not noted on the holder by NGC.

# Washington Dollar Mint Error Special Section

*Editor's Note: Below are photos of a coin edge lettering machine. The new Presidential Dollars features edge lettering that includes the date, Mint mark, IN GOD WE TRUST and E PLURIBUS UNUM. Due to the minting process used on the circulating coins, the edge-incused inscription positions will vary with each coin. The chances of getting upside down rims are about 50/50. This is not a mint error.*

After the minting process is completed, the Presidential Dollars leave the U.S. Mint in huge containers called “ballistic bags,” which hold 140,000 dollars in each bag. These dollars are then counted and rolled by several companies that have contracts with the U.S. Government. Eventually the Federal Reserve Banks distribute these coins to banks across the country.

## **A Statement from the United States Mint:**

“The United States Mint has struck more than 300 million George Washington Presidential \$1 Coins. We have recently learned that an unspecified quantity of these coins inadvertently left the United States Mint at Philadelphia without edge-lettering on them. It is unknown how many of these coins without inscriptions on the edge have been placed into circulation.

The United States Mint understands the importance of the inscriptions ‘In God We Trust’ and ‘E Pluribus Unum,’ as well as the mint mark and year on U.S. coinage. We take this matter seriously. We also consider quality control a high priority. The agency is looking into the matter to determine a possible cause in the manufacturing process.

Production of the Presidential \$1 Coin, with its unique edge-lettering, is a new, complex, high volume manufacturing system, and the United States Mint is determined to make technical adjustments to perfect the process. As we adjust this new process, we intend to eliminate any such defects.

Consistent with the agency’s practice in such situations, the United States Mint has informed the Office of Inspector General of the U.S. Department of the Treasury about this matter.”

# Washington Dollar Mint Error Special Section

Notice the plain edges in the photos.

# Washington Dollar Mint Error Special Section

*Editor's Note: There are many altered and buffed Washington Dollars that are not genuine mint errors. It is very important to have these "missing edge lettering" Presidential Dollars authenticated and certified by PCGS, NGC, ICG or ANACS.*

# Washington Dollar Mint Error Special Section

The new Presidential Dollar has been featured in two Coin World cover stories since its release. The cover of the 3/19/07 issue reported the release of the Plain Edge Washington Dollar. The U.S. Mint Director Edmund C. Moy stated that “it is still too early to determine the exact number of Presidential dollars that missed going through the equipment that imparts the incuse edge inscriptions of the date, Mint mark, IN GOD WE TRUST and E PLURIBUS UNUM, although it could be in the tens of thousands, or even much higher.” Mint Director Edmund C. Moy also stated:

*“We’re embarrassed about these mistakes and we’re working to correct them. As a consequence of this, it’s created a lot of interest among collectors... It wasn’t intentional by the Mint. This was not part of a secret or covert plan or marketing strategy of ours. This was a mistake we feel badly about. There were manufacturing errors that were made. The men and women at the Mint and also the Mint director take responsibility for those error coins we know that we’ve made. We’re embarrassed by these mistakes and we’re working to correct them.”*

A second story entitled, Mint Probes Dollar Edge Errors, appeared on the cover of the 4/2/07 issue of Coin World.

Numismatic News reported that the Mint Director Edmund C. Moy would host a collector forum at the American Numismatic Association’s National Money Show in Charlotte, North Carolina. It was announced that he would be available to the public from 11 a.m. to noon on March 16th at the Mint’s booth on the show bourse.

# Washington Dollar Mint Error Special Section

# Altered Washington Dollars Surface

*Editor's Note: The following article was posted on March 22, 2007 on the NGC website (ngccoin.com).*

## *Presidential Dollars are filed to resemble widely publicized Missing Edge Lettering examples*

Less than a month after their official release, Presidential \$1 Coins with altered edges are being submitted to NGC for certification.

Considerable attention has been focused on Presidential \$1 Coins with edge lettering errors. The edge lettering is applied to these coins after they are struck in a process similar to the upsetting mill that raises rims during planchet preparation. As such, the edge lettering orientation will vary depending on how the coin falls into machine that impresses the letters, and its positioning and orientation on the coins are random. Nonetheless, coins are being offered and sold in the marketplace as mint errors in cases where the edge lettering is "upside down" in relationship to the obverse. This is not an error as the lettering orientation is arbitrary to the obverse and reverse of the coin. NGC does not describe the orientation of the edge lettering on its label or during the certification process.

A few un-struck type two planchets with edge lettering have also shown up in the market place and these do appear to be legitimate Mint errors.

There are also a number of Washington dollars being found that do not have any edge lettering. Some of these are legitimate errors, but we are now seeing pieces that have been altered to resemble the plain edge error.

The alteration process is rather simple and consists of filing down the edge to remove the lettering. Since the edge lettering is incuse, considerable filing is needed to remove enough metal to erase traces of any of the letters. The alterations we have seen thus far are not deceptive upon close examination of the coin and measurement of the weight and diameter.

The genuine lettered edge Washington Dollars we tested ranged from 26.41 mm to 26.48 mm in diameter and have a weight ranging from 7.92 g to 7.99 g. A genuine Washington dollar with missing edge lettering fell within this range at 26.46 mm in diameter and 7.98 g. The altered specimen shows a clear loss of diameter and weight through the removal of metal in the process of filing the letters of the edge. An altered specimen weighed 7.89 g with a diameter of 26.21 mm.

# Washington Dollar Mint Error Special Section

**Photo 1:** This is a genuine lettered edge Washington dollar with the smooth edge and fine vertical lines created when the coin was ejected from the collar after being struck.

**Photo 2:** This is a genuine Washington dollar with the edge lettering missing. The surfaces are original and unaltered and also show the fine vertical ejection marks.

# Washington Dollar Mint Error Special Section

**Photo 3:** This is the altered Washington dollar with the edge filed down sufficiently to give the appearance of a piece that did not receive its lettered edge impression. Note the fine horizontal file marks, the rounded edge and the lack of vertical ejection marks.

**Photo 4:** (File: WASHINGTON \$ ALT EDGE 1) A closer view reveals the extent of the horizontal file marks and the lack of vertical ejection marks on the edge.

Specimen Comparison	Diameter	Weight
ALTERED: EDGE LETTERING REMOVED	26.21 mm	7.89 g
GENUINE: NO EDGE LETTERING	26.46 mm	7.98 g
GENUINE: RANGE OF TESTED EDGE LETTERED SPECIMENS	26.41 mm to 26.48 mm	7.92 g to 7.99 g

# PNG Experts Warn of Altered, No Edge-Lettering Dollars

**PNG Press Release:** March 21, 2007

The Professional Numismatists Guild (PNG), a nonprofit organization composed of the country's top rare coin and paper money dealers, issued the following consumer protection advisory on March 21, 2007 about altered coins being sold as genuine errors.

Some 2007-dated Presidential dollar coins, deliberately altered after leaving the United States Mint to remove the edge lettering including the motto, "In God We Trust," are being offered to unsuspecting buyers in online auctions and at swap meets. The Mint mistakenly released for circulation thousands of genuine coins without the edge lettering, but the PNG cautions that worthless, fake versions now are appearing in the marketplace, especially Internet auctions.

"The edge lettering on some perfectly-made coins is being intentionally removed in machine shops to fraudulently make the coins appear to have a plain edge without the date, without the mintmark and without the mottos, In God We Trust and E Pluribus Unum. It's the wild, wild West out there online, and it's probably going to get worse before it gets better," said Fred Weinberg of Encino, California, a former President of the Professional Numismatists Guild and an internationally known expert on mis-struck coins.

"You run the risk of paying \$100 or more for an altered coin that's only worth one dollar. Unless you know how to determine authenticity, the coin should be certified by a nationally-recognized authentication company or you should know the reputation of the professional dealer you're buying it from."

The normal weight of the George Washington dollar coin is 8.1 grams (125 grains) and the diameter is 26.5 millimeters. Any plain-edge coins that weigh less than 8 grams (123 grains) or with a diameter of 26 millimeters or less should be viewed with skepticism. They may have been deliberately trimmed to remove the edge lettering, according to the PNG.

"The altered coins are deliberately machined down until the lettering on the edges disappears. It's also possible for the incused lettering to be filled in, then re-plated or re-colored, and then the altered coin is deceitfully sold as a genuine Mint-made error," Weinberg explained.

Weinberg also cautions consumers to be wary of sale pitches for so-called "upside-down" lettering errors.

"The relationship is random between the edge lettering and the 'heads' side on the Presidential dollars. Some coins have the letters reading 'up,' and some are 'upside-down' when you view the front of the coin. These are not inverted-lettering errors, only a random method of placing the edge-lettering on the coins. Half the coins will have the letters up, and half will appear upside down."

Members of the Professional Numismatists Guild must adhere to a strict code of ethics in the buying and selling of rare coins and paper money. For additional information, contact the PNG at 3950 Concordia Lane, Fallbrook, California 92028. Phone: (760) 728-1300 Online: <http://www.PNGdealers.com>

# Washington Dollar Mint Error Special Section

**Editor's Note:** Well known Mint Error Dealer, Fred Weinberg, recently purchased a group of 2007 **Denver** Washington Dollar "Missing Edge Lettering" mint errors. Here is a quote from Fred as well as his authentication letter that he included with each sale.

"Last Friday I bought 70 (out of 72) Plain Edges from a local coin shop. A lady had gone into her local bank branch on Ventura Blvd. in Sherman Oaks (next door to Encino, about two miles east of me), asked for a \$1,000 worth of dollars. The teller laughed at her and said, 'You won't find any of those errors that are on the news - they're all being found in Florida.' She bought a \$1,000 box of paper rolled coins and found 72 Plain Edges! These coins are all from the downtown Los Angeles Federal Reserve, where my bank downstairs got theirs. Yesterday at the same shop, a merchant two doors down came up with six of them! Tom DeLorey examined the first 'Denver' Plain Edge last week in Chicago, and my coins match his as far as 'edge comparison.' There is a difference that can be seen between the D's and P's, but I'm not sure if it's significant enough for the grading services to be able to put Philadelphia or Denver on a holder."

The Denver plain edge has no copper core visible since these were rinsed in a solution that coated the edge.

# Washington Dollar Mint Error Special Section

## Fred Weinberg & Co.

Member: Professional Numismatists Guild; Professional Coin Grading Service; Industry Council for Tangible Assets.

March 16<sup>th</sup>, 2007

### ***2007-DENVER George Washington Presidential Dollar Missing Edge Lettering Mint Error***

The enclosed "Plain Edge" 2007 George Washington Dollar came directly from an original roll of 2007 Denver coins.

These Mint Error coins were purchased by Fred Weinberg and Company between March 9<sup>th</sup> and March 15<sup>th</sup>, 2007 from either the local coin shop that bought them from the person who found them in the original paper wrapped rolls, or by myself directly from another party who found them at a local bank on Ventura Boulevard in Sherman Oaks, California (San Fernando Valley).

The most noticeable difference between these Denver "Plain Edge", and the Philadelphia "Plain Edge" errors is that the Denver coins show very little of the copper core on the edge, and in fact show only a very light "copper tint" on the edge in most cases. The reason for this anomaly is currently being researched.

## The NEW Washington Dollar Errors

by Rich Schemmer (richerrors.com)

**W**ow, talk about a HOT new subject! Since the release of the new Washington dollar in February, all sorts of errors have been found. Most are considered minor or just part of the normal minting process. Then there are the Washington dollars that have NO edge lettering at all!

It appears that many Washington Dollars totally missed this process since this edge lettering happens AFTER the actual striking of the coin. No one knows for sure if the mintage of these Washington dollars that missed this process is 1,000, 20,000 or 300,000. I guess that tally won't be known until the Mint releases an official statement or when all of the bags of Washington Dollars are released from the Federal Reserves.

Ebay has been loaded with these. The amount of pages in the Error section actually doubled. This new error has invited error counterfeiters into grinding off the edge lettering on this new dollar. As long as there is a dollar to be made, these bottom feeders will try to steal your money one way or another, so be careful. PCGS has started to certify these errors, as I'm sure NGC will also. But what if you're not sure what a real one or a fake one looks like? Stay with the dealers who have plenty of positive feedback on eBay. One such dealer from California actually gives a letter of Guarantee & Authentication with his Washington dollar errors.

So you want to buy off eBay:

- \*Look for those sellers with lots of Positive feedbacks
- \*Remember to look for grinding marks on the edge of the coin

\*Weighing the coin may help, but with so little metal being removed the weight will still be close.

\*The internal copper core will be uneven and more to one side than the other. This is normal (look at any Clad coin like a new quarter). If the copper core is "even" beware!

Prices haven't settled on these errors yet, they started out really high, around \$1,200 and now are around the \$200 to \$250 area. \$150 sounds really good if you get a letter of Authentication from the dealer or \$200 if it's certified by PCGS or NGC.

The final price will be determined by the amount that is finally released into circulation. The lower the mintage the higher the price and visa versa.

Beware of the Washington Dollar blank planchets being offered, whether raw or in Washington Dollar Shotgun rolls (rolls rolled by private companies) since these are a scam. The Washington Dollar planchets and the Sacagawea planchets are EXACTLY the same, identical in diameter, weight, and color. Yet some eBayers have been willing to pay HUGE sums of money for a Washington/Sacagawea planchet located in the end of a roll that was made by a private rolling company. Even Government released rolls can be tampered with to include one of these planchets. So what's the scam? Sacagawea planchets regularly sell between \$100-150. Some buyers have been paying \$400, \$800 and even \$2,000 for these so called Washington planchets as singles or in rolls... Be careful, know whom your buying from, ask questions and look at the feedback or just deal with a known error coin dealer.

## Presidential Dollar Errors

by Al Levy (alscoins.com)

Have you ever wondered how our ancestors felt when they heard gold was discovered? Or what it was like searching or digging for that “Mother Load”? I believe the people of Florida experienced this on Feb. 15th when the United States Mint released the first of the new Presidential dollar series. These Washington dollar coins were immediately scrutinized by the error/variety collectors who search for the slightest die variance.

The no edged lettered dollar was immediately discovered by a lucky collector in Florida. He brought this to the attention of the local media creating a mini “Gold Rush”. An article went on to explain that these \$1,000 boxes contained new error coins. They even noted that CWI #103 INSPECTED BY number with “not to be released” until Feb 15, 2007 held the new varieties. Bank tellers in Florida started searching through rolls and found thousands of these errors.

One of the first “smooth edge” dollars found its way on eBay and immediately sold for \$612.00. The 2nd one closed for a mere \$369.00. As more of these errors were listed the prices dropped. Individual coins were averaging \$75. Groups of 10 or more were going for approximately \$600. Then, the story broke across the nation on 03/07, enhancing the “Gold Fever”. These errors were now being auctioned on the internet averaging \$850 each.

The Mint’s news release stated that the coins edge lettering was being added after the coins were initially struck. The article stated how the edge lettering was added regardless of the position of the President’s bust. Collectors ignored this and created a new selling frenzy referred to as the “upside down lettered edge.” This new variety was listed on the Internet commanding record prices of \$75 plus for each coin. Insanity prevailed as

sellers gained a small fortune while buyers failed to read the full story to get the facts.

Speculation ran rampant in the Internet chat rooms. Claims were being made that someone in the Mint (who was an atheist) created these new “godless” dollars intentionally. Others said our founding fathers were spinning in their graves for taking the words “In God We Trust” off government issued coins. The fact is, the first coin the have “In God We Trust” was the 1864 Two Cent piece.

The error section of eBay normally lists twelve pages of new items on the weekends and five pages during the week. Suddenly, forty five pages were being added daily. Most of which were listing the new dollars. Ebay even added a new section under dollars: “Presidential (2007-Now),” and record prices were being generated.

An amazing money grabbing venture was the listings for Presidential blank planchets. These are the same blanks used for the Sacagawea dollars. The first blank listed on eBay as a Washington Dollar error closed for \$1,000. These type II blanks have been retailing since the Sacagawea dollar was first released in 2000 and are currently retailing between \$75 to \$100. At this time, there is no way to tell the difference between the Sacagawea or Presidential dollar blank. The grading services are expected to list these as simply Maganese blank planchet dollars. Both blanks weigh in at 8.1 grams (+ or - a tolerance factor) and are made of the same material and size. No mention of which dollar type can be identified correctly on the slab, so these coins are being over sold.

I believe for sometime eBay sellers are using a Klopp crimper (shotgun shell paper coin roller machine) which re-rolls previously opened rolls. Blank planchets will

# Washington Dollar Mint Error Special Section

be inserted into the end of a roll and are professionally re-crimped. These will be sold to the unsuspecting buyer for large amounts of money on internet auctions as original Mint wrapped rolls. Since vast amounts of these blanks are available on the market, don't be surprised to learn most error dealers are out of stock. Because the lettered edge blank has been discovered and written about, people will believe that this is what they may find in an unopened roll where the blank is showing.

It is not unusual for a new coin issue to mandate a new process and use additional equipment that creates errors for the public to find, and a headache for the Mint. The Mint considers this to be an embarrassment. They do not intentionally create error coins for the collector. Normal procedures at the Mint capture the majority of all spoilage. The lack of training of new personnel, the failure to pass procedure changes onto the next shift, equipment failure, etc., help to create a new error/variety for collectors and dealers which allows new collectors to enter the market.

## **New errors/future errors to look for in reference to the new Presidential dollars:**

1. Smooth edge - being reported from the Philadelphia and Denver Mints. (As of this date, there is no definitive way to tell the difference as to which branch mint created these.)
2. Starburst smooth edge - between the "\$1" on the reverse is Washington's eye due to die clashing. Additionally, the obverse and reverse were struck through thin layers of oil/grease creating a starburst appearance. Individuals reported finding every tenth smooth edge dollar to be this variety.
3. Upside down lettered edge - common as 50% of all coins will show this.
  - A. Philadelphia Mint
  - B. Denver Mint
4. Misplaced lettered edge:
  - A. Slippage of the lettering. E Pluibus Unum almost on top of the mintmark.
  - B. Dropped letters or doubled letters.
  - C. Double lettered edge (Something to look for as this will be highly desirable)
  - D. Dual date lettered edge (Future possibility: 2007 over 2008) or Wrong president on wrong dated lettered edge!!! Or, "P" over "D" mintmarks.
  - E. Washington dollar struck over a struck Madison dollar. (I would love to see this one!) Or, Sacagawea dollar struck over a Presidential dollar)
  - F. Off metals/double denominations - Washington dollar struck on a dime planchet. (OR, a struck dime planchet.)
  - G. Very faint edge lettering (known)
5. Rotated reverses - already known: 40% to 90% clockwise rotation
6. Split off clad layers

*Editor's Note: These Washington Dollar "Missing Edge Lettering" mint errors have also been sold on the Home Shopping Network on four separate occasions. The first three times HSN featured ICG certified MS 60 through MS 63 pieces and sold out at \$399.00 each. On April 16th they featured ICG certified double error Washington Dollars with "Missing Edge Lettering" and "Struck Through Grease" that sold out at \$599.00 each.*

## PCGS Certifies Presidential Dollar Blank Planchet with Edge Lettering - Discovery Coin -

The first known lettered-edge, blank planchet Presidential dollar was discovered by Ray and Mary Smith of Fort Collins, Colorado. This error was found in a 25-coin roll from a local bank. The Smith's sent the coin to PCGS for certification and will receive a \$2,500 reward for this Discovery Coin. Ron Guth, the PCGS President, stated that "although we anticipated its appearance, we never expected one to appear so quickly. Nonetheless, PCGS is thrilled to be able to certify the discovery example, and we congratulate Ray and Mary Smith on their lucky find. We're also happy that our reward program is helping to bring important rarities to light."

This type two (raised rim) planchet somehow made it to the final stage of the Presidential dollar minting process without being struck or burnished. The incuse edge lettering is complete with the date, mintmark and the two mottos, In God We Trust and E Pluribus Unum.

Ray and Mary Smith contacted us and wanted to share their discovery coin with the readers of Mint Error News Magazine. They sent us these photos of this incredible mint error in the PCGS holder.

## Population Reports & Estimates

*The U.S. Mint stated in a recent press release that “The United States Mint has struck more than 300 million George Washington Presidential \$1 Coins. We have recently learned that an unspecified quantity of these coins inadvertently left the United States Mint at Philadelphia without edge-lettering on them. It is unknown how many of these coins without inscriptions on the edge have been placed into circulation.”*

### Estimated mintages of the “Missing Edge Lettering” Washington Dollar

There has been wide speculation regarding the total number of Washington Dollars that are missing the edge lettering. Estimates range from a low of 40,000 to a high of 400,000. It has yet to be determined if all or part of one ballistic bag of Washington Dollars was released without the inscriptions on the edge. Many people are wondering if the U.S. Mint will release another statement on their estimation of the number of “Missing Edge Lettering” Washington Dollars released.

### Population Reports

Below are the population reports for PCGS, NGC, ICG and ANACS reflecting the number of “Missing Edge Lettering” George Washington Dollars that have been certified through mid-April. Since these population figures change daily, please check with the individual Grading Services for the most recent figures. Considering that over 300 million George Washington Presidential Dollar coins were struck by the Philadelphia and Denver Mints in early 2007, the numbers below reflect only a small fraction of the total number minted.

Service / Grade	AU 58	MS 60	MS 61	MS 62	MS 63	MS 64	MS 65	MS 66	MS 67	Total
<b>PCGS</b>	-	-	-	-	182	2,663	4,605	810	-	<b>8,260</b>
<b>NGC *</b>	1	-	-	6	66	5,326	12,595	993	23	<b>19,010</b>
<b>ICG</b>	-	-	32	104	1,416	3,220	1,308	633	234	<b>6,947</b>
<b>ANACS</b>	-	1	1	7	22	245	428	53	2	<b>759</b>
<b>Total</b>	<b>1</b>	<b>1</b>	<b>33</b>	<b>117</b>	<b>1,686</b>	<b>11,454</b>	<b>18,936</b>	<b>2,489</b>	<b>259</b>	<b>34,976</b>

\* Please note: NGC has also certified approximately 15,000 of these “Missing Edge Lettering” mint errors as “BU.”

# Washington Dollar Mint Error Special Section

## 1812 Cap Bust Half Overton #103 No Edge Lettering - NGC AU 58

**Editor's Note:** *Although the Washington Dollar “missing edge lettering” is a new error, this type of error has happened in the past. Here is a spectacular 200 year old Cap Bust Half Dollar with no edge lettering:*

This famous Bust Half mint error was from the Logan Collection auctioned during the 2003 ANA in Baltimore. It is one of only six known plain edge Bust Half Dollars in the entire series. It appears to be broadstruck since it is on a Type 1 blank planchet.

This fascinating bust half dollar completely lacks edge lettering and as such is extremely rare, with only a handful of specimens known for the entire lettered edge bust half dollar series (1794 to 1836). These “plain edge” pieces occurred because they did not receive the first step in the minting process: the feeding of the blank through the edge-lettering machine that applied the words “FIFTY CENTS OR HALF A DOLLAR” to the blank’s edge.

This lettering machine, known as a Castaing machine for its inventor, the Frenchman Jean Castaing, consisted of two flat bar dies, one fixed in place and the other moving. Using a hand crank, the blank was rotated between the bar dies as the lettering was pressed into the coin. The distance between the bar dies was slightly less than the diameter of the half dollar blank. As a result, the rims of the blank planchet were raised and its diameter became smaller as it rotated through the machine.

Because this coin didn’t pass through the Castaing machine when it was a blank, its diameter is slightly larger than normal. The distance from the stars to the edge on the obverse is greater than usual, and similarly the distance from the tops of the letters to the edge on the reverse is greater than usual.

In addition, the edges of this coin have a much different look. All around the obverse, the outer edge is rounded as it makes the 90 degree transition into the edge; all around the reverse, the outer edge is sharp as it makes the transition. This is because the blank was punched out of a piece of silver strip. The side of the blank that the punch pushed on had squared (sharp) edges and the side which popped out first received the round edges. Of course these features would have been obliterated if this piece had passed through the Castaing machine.

Among the few known plain edge bust half dollars, this piece shows off its unusual features to an exceptional degree, and its high grade magnifies its desirability. It is a wonderful and rare error coin!

# Two New “Extrusion Strikes”

by Mike Diamond

Most people would agree that in order to get a large, sharply defined zone of die-struck design on one face, there has to be resistance to the strike that is applied to the opposite face. When resistance to the impact of a die is low or non-existent – perhaps as the result of an abnormally thin planchet, a defective planchet, or a broken die – the strike should be weak or absent. Generally this principle holds up. But there is one rare exception – the “extrusion strike”.

This phenomenon was extensively described and analyzed three years ago in *Errorscope*, the bimonthly magazine of CONECA (Diamond, 2004). An extrusion strike is a rare effect that may be found in association with a wide range of error types including indents, partial brockages, large strike-throughs, and retained cuds. Except for the last, each of these errors involves a planchet that is trapped between one of the dies, the overlapping intrusive object, and the collar. At the same time, an avenue of escape is left between the edge of the intrusive object and the collar, a gap into which part of the planchet bulges or extrudes. Coin metal likes to follow the path of least resistance, bulging into the gap and colliding with the die face that seals off the gap. At the same time, the coin metal withdraws from the opposite die, leaving a featureless pucker or trough on the opposite face.

Now, all this might seem a bit confusing, but all will become clear momentarily.

Figures 1 and 2 show a truly stellar example of an extrusion strike in association with a large indent. The

indent on this 1999 New Jersey quarter was produced by an unstruck planchet that intruded into the striking chamber and that was interposed between the obverse (hammer) die and the planchet represented by this coin. Beyond the indent on the obverse face there is a well-struck crescent of obverse design bearing the words UNITED STATES OF.

The outer parts of the letters terminate abruptly as they meet a downward sloping surface that ends at the edge of the coin.

**Figure 1a.** Obverse face of a 1999 New Jersey quarter with an 85% indent and a clear extrusion strike on the obverse face. Coin acquired from Alan Levy.

# Two New “Extrusion Strikes”

The reverse face shows a die-struck design opposite the indent. Beyond that is a featureless crescent that lies opposite the die-struck obverse design. This featureless zone is deeply recessed. The die-struck reverse design ends abruptly at the internal margin of this crescentic trough.

**Figure 1b.** Reverse face of the same specimen showing a sharply defined, deeply recessed, crescentic trough.

The edge of the quarter shows a complete and very strong partial collar error. In other words, the collar was partly deployed as the coin was struck. This is very important, as an extrusion strike cannot form if the collar is not deployed and the coin is consequently broadstruck.

**Figure 1c.** Edge of the same coin photographed at the midpoint of the extrusion strike. A strong partial collar is easily seen.

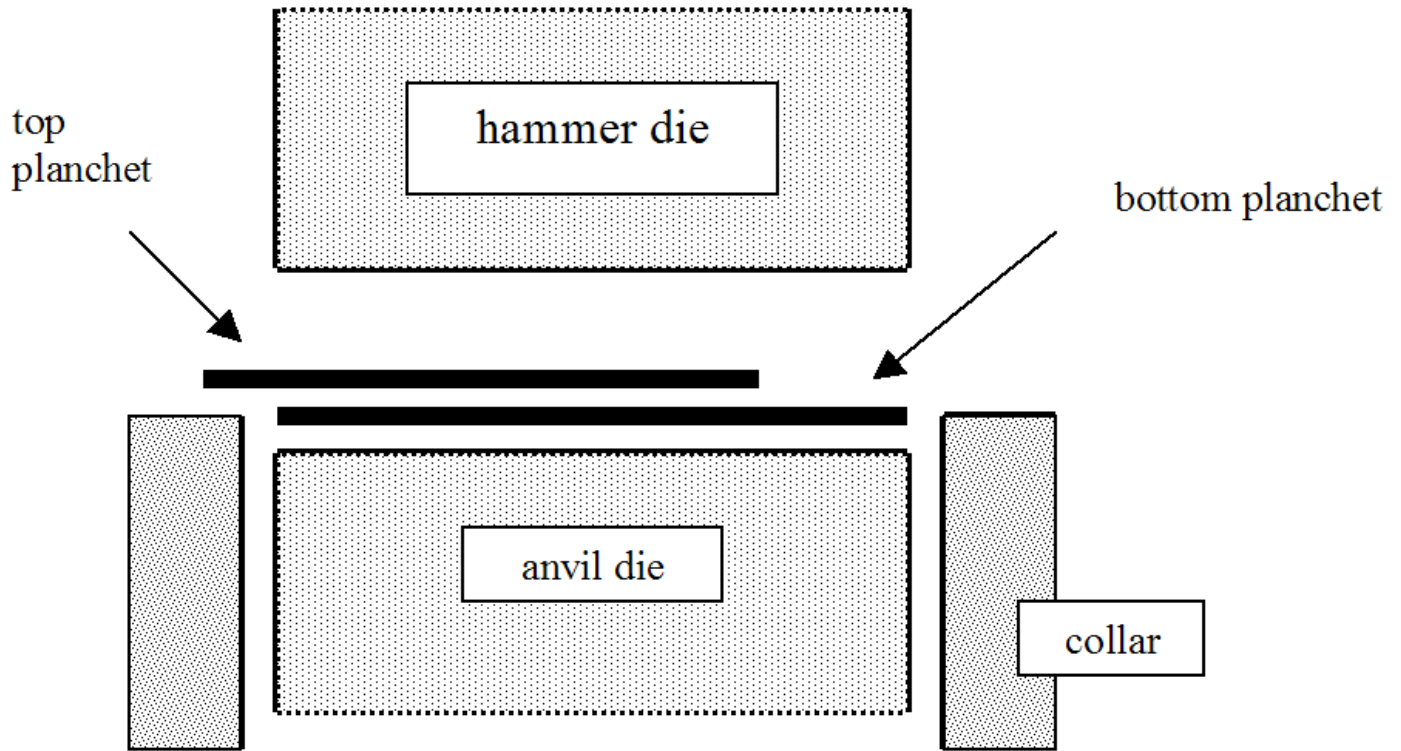

**Figure 2a.** Close-up of the crescentic trough.

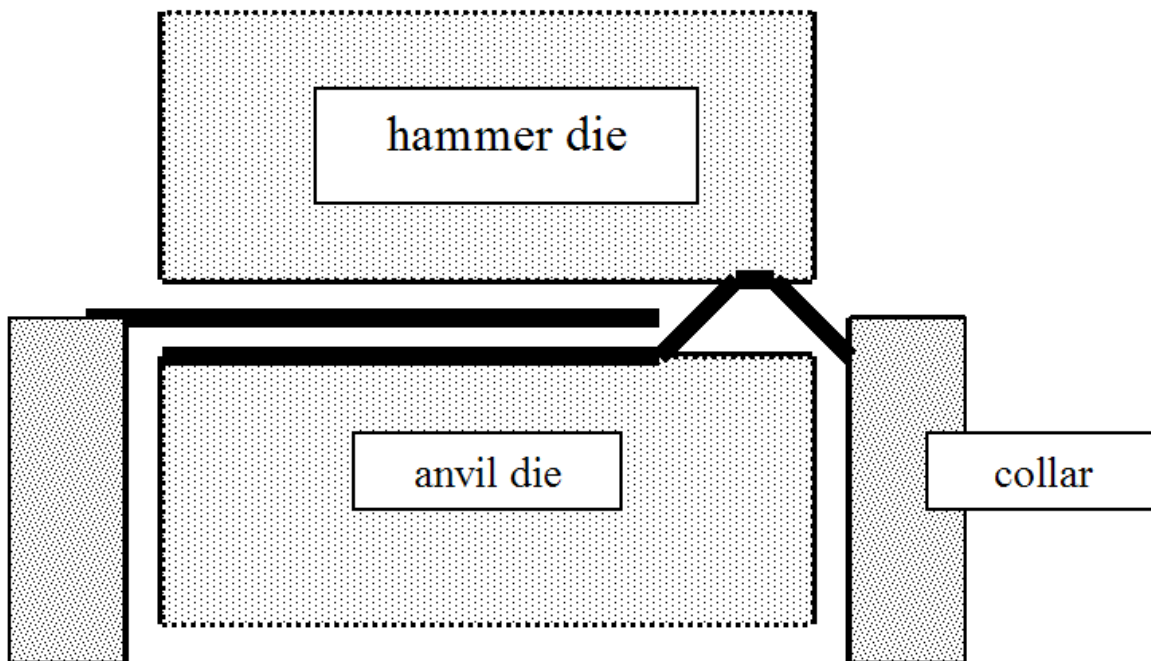

**Figure 2b.** Extreme close-up near the upper horn of the trough, showing a granular texture and microscopic compression lines.

The odd appearance of this coin is explained graphically in Figure 3. The bottom planchet (the coin under discussion) was trapped between the overlying planchet, the reverse die, and the collar. The gap between the overlying planchet and the collar served as an avenue of escape for the coin metal. The coin metal bulged up into this gap, simultaneously drawing away from the reverse die. The apex of the bulge slammed violently into the obverse die face suspended just above it. The sloping lateral side of the bulge is represented by the sloping surface seen just beyond the truncated letters of UNITED STATES OF.

# Two New “Extrusion Strikes”

**Figure 3a.** Schematic diagram of a coinage press that will shortly produce an extrusion strike.

**Figure 3b.** Schematic diagram showing the aftermath of the strike. This is how the kind of extrusion strikes illustrated in this article form.

# Two New “Extrusion Strikes”

The unstruck crescent on the reverse shows evidence of the tremendous compressive and bending stresses this part of the coin was placed under. The surface is grainy because metal crystallites “pop out” when placed under such stress. Numerous microscopic compression lines are also visible, especially in the “horns” of the crescent.

Extrusion strikes this dramatic are surpassingly rare. This is the second best example I’ve seen on any U.S. coin. The best one I’ve seen is a Connecticut quarter with an even larger extrusion strike in association with a partial brockage. I haven’t seen any decent examples among cents, nickels, half dollars, or dollars. I’ve seen a few examples on dimes, but they were much smaller relative to the total area of the coin.

Indents, partial brockages, and large strike-throughs are common. So why are extrusion strikes so rare? Essentially, it is because many different parameters must line up just right. (1) The planchet has to be just the right thickness. Nickels, for example, are probably too thick for a decent extrusion strike to form. (2) The thickness of the intrusive object does not seem to be as important, although it may still play a role. (3) I’m not sure if planchet hardness is involved, but I’ve never seen a decent extrusion strike on a silver coin, a copper-alloy U.S. cent, or a copper-plated zinc cent, all of which are relatively soft. (4) The intrusive object has to be just the right size, shielding somewhere between 60% and 90% of the planchet’s surface. (5) The collar must be deployed, either completely or partially. (6) Finally, ram pressure and minimum die distance have to be just right. Ram pressure is the amount of force that is set to be delivered by the hammer die in the presence of a planchet, presuming minimum die distance is normal. Minimum die distance refers to the closest approach made by the dies in the absence of a planchet. Under normal striking pressures (determined by a combination of ram pressure and minimum die distance), an extrusion strike fails to form and both faces show a die-struck design beyond the indent/brockage/strike-through. An extrusion strike therefore requires either abnormally low ram pressure, excessive minimum die distance (insufficient die approximation), or both.

Our second specimen is an Indian 5 rupees coin with a large indent (approximately 60%) and a weak extrusion strike on the reverse face (Figure 4). In Indian coins, the reverse face is almost always struck by the hammer die, which appears to be the case with this specimen. Although struck fully within the collar, there is a slight trace of a partial collar lip adjacent to the reverse face along a few arc degrees of the coin’s edge.

**Figure 4a.** Reverse face of an India 5 rupees coin, showing a 60% indent and a weak extrusion strike.

Ordinarily, I wouldn’t expect an extrusion strike to form on a 5 rupees coin, because these copper-nickel coins are quite thick and heavy. They weigh in at around 9 grams, although at 23mm, their diameter is only slightly greater than that of a 5 gram U.S. nickel. The extrusion strike on this coin owes its existence to the fact that we’re dealing with an abnormally thin planchet that weighs a mere 4.9grams. I assume that the indent was from a normal 5 rupees planchet, which makes this weak extrusion strike rather impressive in hindsight, as the coin metal had to rise several millimeters in order to reach the reverse die face hovering overhead. The crescentic trough on the reverse is correspondingly very deep. Only the very

# Two New “Extrusion Strikes”

**Figure 4b.** Obverse face of the same coin showing an oval area of die-struck design opposite the indent, and a scooped-out, crescentic zone lying opposite the extrusion strike.

apex of the domed coin metal contacted the reverse die face. Consequently, a very broad, gently sloping surface falls away from the struck design to merge with the edge of the coin.

Extrusion strikes provide a fascinating exception to the notion that a die-struck design can only be generated against resistance applied to the opposite face. Here, the coin metal bows upward at high velocity and smacks into the die face with significant force. The die face is the passive partner in this relationship.

## Error Coin Information Exchange

The Error Coin Information Exchange (ECIE) is a freewheeling forum dedicated to the study of error coins and varieties. Founded and hosted by veteran writer and researcher Mike Diamond, it is a great place to visit, whether you're an established collector or a novice. ECIE is not flashy and doesn't waste your time with a message board clogged with idle chit-chat. It simply provides the best information on error coins available on the web. Here you can read about late-breaking developments; find out about the newest discoveries; listen or participate in spirited debates about how error coins are produced; test your skills with periodic quizzes and brain-teasers. ECIE proudly maintains an atmosphere of skeptical inquiry. Here, no claim goes unchallenged and no theory goes untested. This is the best place to find out what kind of error you really have, how it was created, and the extent to which it is rare or unusual.

**Policy Statement:** By design, ECIE does not attempt to develop partnerships with dealers, grading services, or auction houses. It neither seeks, nor encourages, discounts, promotions, giveaways, or advertisements. To do otherwise would create a conflict of interest that could compromise the fierce independence and impartiality that distinguishes ECIE from all other on-line error coin clubs.

# Off-Center Errors

by Al Levy (alscoins.com)

Here are records of recent sales of off-center mint errors on eBay:

1. All coins were listed on eBay and closed from January 1, 2007 to March 31, 2007.
2. All lots had buyers. If the coins actually changed hands is unknown.
3. A picture accompanied each lot or it was not recognized.
4. Mislabeled items were ignored.
5. Some lots may have changed hands more than once.

6. "D" next to the date symbolizes that the coin had damage.
7. "C" next to the date symbolizes that the coin was cleaned.
8. "B" next to the date symbolizes that the coin had damage and was cleaned.
9. If the date or mint mark was missing or partially visible, parentheses were used.
10. Postage/handling/insurance fees were ignored.
11. Major auctions were not listed.

# Off-Metal & Clad Layer Split-Off Errors

by Al Levy (alscoins.com)

1. ALL LOTS HAD BUYERS. IF THE COINS ACTUALLY CHANGED HANDS IS UNKNOWN.
2. A PICTURE ACCOMPANIED EACH LOT OR IT WAS NOT RECOGNIZED.
3. BLURRY PICTURES OR OTHER PROBLEMS ARE NOTATED UNDER "OBSERVATION".
4. ITEMS MISLABELLED COMMANDED A SMALL PREMIUM.
5. SOME LOTS CHANGED HANDS MORE THAN ONCE.
6. ANY SCRATCHES, DENTS OR DEFECTS NOTATED WERE EITHER IN THE DESCRIPTION OR GRADING SERVICES' HOLDERS.
7. AUCTION HOUSES THAT LISTED THESE ERRORS WERE IGNORED.
8. SHIPPING CHARGES ARE NOT INCLUDED.

# Buffalo Nickel “Speared Bison” & Wisconsin Quarter “Extra Leaves”

by Al Levy (alscoins.com)

PLEASE NOTE: THE ERROR TYPES LISTED BELOW WERE EBAY LOTS THAT CLOSED WITH A HIGH BIDDER. IF THE RESERVE PRICE WAS NOT MET, OR PICTURE WAS NOT ATTACHED, THEN I IGNORED THE AUCTION. FUZZY PICTURES, OR QUESTIONABLE DESCRIPTIONS ARE NOT INCLUDED.

AN IMPORTANT OBSERVATION ABOUT THE BUFFALO 5c “SPEARED BISON” & THE “WISCONSIN” 25c EXTRA LEAFS ARE EBAY ITEMS ONLY. DEALERS ARE SHOWING INTEREST IN BUYING THESE ITEMS FOR INVENTORY. BUT, ONLY IF THEY ARE CHEAP. PRICES HAVE DROPPED CONSIDERABLY FOR THE 5c “SPEARED BISOONS”.

THE HIGH LEAF IS SUPPOSE TO BE SCARCER THAN THE LOW LEAF. CHECK OUT THE SALES TOTALS AS BOTH VARIETIES HAVE DROPPED IN PRICE.

END OF ROLL COINS. COLLECTORS NEED TO KNOW THAT THERE IS A MACHINE ON THE MARKET THAT WILL ALLOW ANYONE TO ROLL YOUR OWN COINS. IT IS A CRIMPING MACHINE TO BE USED WITH PRE-CRIMPED (SHOTGUN SHELL) STYLE WRAPPERS.

# Mint Errors on Doubled Dies

by Al Levy (alscoins.com)

I DID NOT COMPARE THE LISTED DIE NUMBER IN THE AUCTION TO THE DESIGNATED DIE NUMBER ACTUALLY ASSIGNED. THERE WERE TOO MANY VARIETIES TO TRY AND COMPARE SO I TOOK THE WORD OF THE SELLER. IT WAS INTERESTING TO NOTE MANY OF THESE DOUBLED DIES WERE LISTED BY THE AUTHENTICATORS. MANY OF THE COINS LISTED DID NOT SELL. PCGS GRADED COINS BROUGHT THE HIGHEST PRICES.

# **CONECA**

The Combined Organizations of Numismatic Error Collectors of America

**CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit [conecaonline.org](http://conecaonline.org) and enjoy!**

#### **CONECA Variety Attribution Services**

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

#### **CONECA Error Examination Services**

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

## BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.

## Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our web site you must agree to the following terms and conditions.

1. All major U.S. mint errors are accepted if they are certified by PCGS, NGC, ICG or ANACS.
2. The approximate value of each item must exceed \$5,000.
3. Each item must meet our inventory criteria in terms of desirability and market value.
4. Byers Numismatic Corp charges a 10 % commission for each sale.
5. The minimum time for any listing is thirty days.
6. Seller agrees to a seven day return privilege from date of receipt.
7. Seller agrees to use an escrow service if requested by the buyer.
8. We reserve the right to deny or cancel any listing at any time.
9. All listing are subject to prior sale.

Please do not offer us the following:

1. More than two coins bonded together.
2. Caps more than ½ inch high.
3. U.S. Errors that were obviously and intentionally struck as error coins. No impossible mint errors.
4. We only accept consignments of U.S. Errors that were legitimately released through normal distribution channels.

## Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

## Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a Mint Error collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at [mike@mikebyers.com](mailto:mike@mikebyers.com).

# Mint Error News Price Guide

*- Entire Price Guide Updated 03/01/07 -*

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

## Proof Errors

**P**roof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,500 - \$2,500	N/A	\$4,000	\$3,000 - \$5,000	\$750
Proof Jefferson Nickel	\$2,500 - \$4,000	\$4,000	\$6,000	\$3,000 - \$5,000	\$1,000
Proof Clad Dime	\$3,000 - \$5,000	N/A	\$6,000	\$3,500 - \$5,000	\$1,250

Proof Clad Half	\$5,000 - \$7,000	\$4,000 - \$5,000	\$7,500	\$7,500 - \$10,000	\$2,000

# Mint Error News Price Guide

## Broadstrikes

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

## Partial Collars

**P**artial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Denomination	XF/AU	Unc
Large Cent	\$100	\$200

## Uniface Strikes

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Denomination	Uniface Obverse XF	Uniface Obverse Unc	Uniface Reverse XF	Uniface Reverse Unc
Large Cent	\$1,500	\$4,000	\$1,250	\$2,000

## Bonded Coins

**B**onded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets

## Coins Struck on Feeder Finger Tips

After a recent tour of the U.S. Mint at Philadelphia, it was discovered that the minting process had changed to some degree. One of the changes was that “feeder fingers” were used during the striking of all denominations of U.S. coins. Prior to this tour, U.S. coins that were struck on feeder finger tips were authenticated and described as being struck on aluminum scrap. Coins from all modern denominations have been discovered that were struck on the tips of these feeder fingers.

Denomination	Small	Medium	Large
Lincoln Cent Memorial	\$2,500	\$3,500	\$5,000
Jefferson Nickel	\$3,000	\$4,500	\$6,000

## Struck Fragments

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	–	\$2,000
Lincoln Cent Wheat Ears	\$750	–
Lincoln Cent Memorial	\$75	\$125
3 Cent Nickel	–	\$5,000

## Mated Pairs

**M**ated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps
Lincoln Cent Wheat Ears	\$2,000	\$1,500	–	–
Lincoln Cent Memorial	\$200	\$300	\$500	\$750

## Transitional Errors

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem
Lincoln Cent 1943 Transitional	Copper Cent Planchet	\$40,000 +	\$75,000 +	\$100,000 +	\$150,000 +

## U.S. Gold Errors

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$5,000	\$10,000	\$3,000	\$12,500	\$25,000
\$1 Gold Type 2	\$6,000	—	\$12,500	—	—

## Indents

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

## Die Caps

**D**ie caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

## Die Adjustment Strikes

**D**ie adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

## Double Denominations

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

## Brockages

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

## Double & Multiple Strikes

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

## Off-Center Strikes

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

## Off-Metals

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

# Mint Error Prices: Then & Now

by Mike Byers (mikebyers.com)

From 1974 - 1978 I mailed out over 25 price lists of major mint errors. My all time favorite was my first catalog which was photographed, printed and distributed in 1975 by John Devine (Lonesome John) from Newbury Park, CA. It was a 26 page catalog containing the finest major mint errors with photographs, descriptions and prices.

Readers who are starting to collect mint errors will find it interesting to compare today's prices of major mint errors with those of 1975. It is amazing to see what these coins sold for and what they are worth today!

UNC TRIPLE STRUCK OFF METAL (1971)

There are only two triple struck Ike dollars in existence. This one also happens to be struck on a copper cent blank planchet. The only IKE triple struck on any other planchet. **UNIQUE \$1,950**

Today's value:  
**\$30,000**

BU TRANSITIONAL 1964

Kennedy Half struck on a clad quarter planchet intended for striking coins in 1965. Not only is this a transitional since it is struck clad instead of silver, but also an off-metal. This is a very under rated transitional off-metal. Much rarer than the 1965 50¢ on a clad 25¢. I should think that this error will be popular. **\$850**

Today's value:  
**\$15,000**

UNC OFF CENTER LARGE CENT 1849

Also out of the BOLT Collection. Struck 50% off center @ K-2. Full date. GEM strike UNC **\$600**

Today's value:  
**\$10,000**

BU QUADRUPLE STRUCK CAP ND

Saddle struck Lincoln Cent over a double struck obverse capped die. Reverse is uniface. Very broadstruck. Obv rim folded over where saddled. **\$500**

Today's value:  
**\$750**

Today's value:  
**\$4,000**

BU IKE OFF METAL 1974D

Ike Struck on a Commemorative silver Philippine 1 Piso planchet. Weight is 222.2 grains. The content is 90% silver, 10% copper. **VERY RARE**  
All of the others are on the regular piso blank \$1,500

Today's value:  
**\$6,000**

BU FRANKLIN ON A DIME ND

Franklin Half dollar struck on a silver dime blank planchet. Partial date is visible. The strike is so strong that you can see the lines on the Liberty Bell. Nice centering. **CHOICE**  
\$350

11.

Today's value:  
**\$150,000**

DOUBLE EAGLE STRUCK ON A CENT

1851 Twenty Dollar Gold Piece struck on a large cent blank planchet. In 1914 it was recorded in the ANS Exposition as part of William Woodin loan display of pattern pieces. Later, it was in the Newcomer collection, and after his death in 1933 it was purchased by Col. Green or Virgil Brand. Eventually it was sold to B. C. Johnson, and then to Dr. J. Hewitt Judd. Judd listed it, with illustration in Appendix B of his pattern book as a mint error. It was Lot #160 in the Catalog of the Judd Collection in 1962 (Kosoff). This American Rarity is conservatively priced.

\$12,500

**UNIQUE**

14.

Today's value:  
**\$100,000**

INDIAN HEAD CENT STRUCK IN GOLD

One of the most important and famous United States Mint Errors. Struck on a quarter eagle blank. Formerly in the B. G. Johnson and the Col. Green Collections. We purchased the coin as lot #609 of the John A. Beck Collection, auctioned by the Abner Kreisberg Corporation, on January 25, 1975. Dr. Judd lists this coin as one of four known. We paid \$7,750 for the coin and have turned down four firm offers since, the last for \$15,000. This Error is the highlight of any collection of United States Gold Coins. We are proud to offer this extremely rare coin.

\$20,000.00

15.

Today's value:  
**\$40,000**

UNC INDIAN SILVER CENT 1899

Struck on a 1899 Barber Dime. There are about ten Indian silver cents known, but this is the only double denomination. Obliterated design.  
\$1,750

Today's value:  
**\$20,000**

BU OFF CENTER FIVE DOLLAR LIBERTY 1900S

This beautiful off center gold error recently sold for \$4000.00 Struck 10% off center # K12 and also slightly broadstruck on type 1 blank.  
\$5000

24.

# MINT *ERROR* NEWS<sup>TM</sup> MUSEUM

Enjoy viewing the major mint errors in our museum. These are exciting and dramatic examples of major mint errors that we wanted to share with our readers. To view more unique rarities go to [mikebyers.com](http://mikebyers.com) and click on the “museum” link.

## WHOLESALE PRICE LIST OF MAJOR MINT ERROR COINS & CURRENCY

We proudly offer many dramatic & very Rare Type coins, and more current Errors (1960's + 1970's) that have not been on the market for 20-30 years. These really "Fresh" Errors are from a collection put together in the late 1960's thru the 1980's, and many were originally purchased directly from Phil Steiner/Mike Zimpher, well-known mid-west dealers back then.

Don't forget you can view all Certified Error Coins and Error Currency on our website ([www.FredWeinberg.com](http://www.FredWeinberg.com)). Every customer ordering over \$100 off this list/website will receive a special "Year End Thank You" gift. There are many Reduced Prices from the unsold coins on our June list. When ordering by phone or email, please list the page #, short description of the item (Date, Error, Grade, and Price), so we know exactly what coin (s) you are interested in.

We accept Checks, Money Orders, & Pay-Pal Sorry No Credit Cards...We always pay for all Postage & Insurance fees for U.S. shipments. Paying via Pay-Pal: Just use our email address ([Fred@Fredweinberg.com](mailto:Fred@Fredweinberg.com)) as the recipient when sending funds.

Note: The PCGS/NGC Certified section of better Major Mint Errors start after the raw listings.

### Abbreviations Used:

DSBS=Die Struck Both Sides, (refers to a D/S coin's second strike) F/O=Flip-over D/S=Double Struck B/S=Broadstruck FS=Full Steps FB=Full Bands FBL=Full Bell Lines RD=Red R+B=Red & Brown PL=Proof-Like CCW=Counter-Clockwise DAS=Die Adjustment Strike

Note: Clip %'s are by actual weight, not appearance (most clips "look larger" than % of clip).

*Editor's Note: Fred Weinberg's price list was originally published in November of 2006. The following list is a selection of Fred Weinberg's inventory and is current as of March 31, 2007. To view the complete inventory list, please visit [fredweinberg.com](http://fredweinberg.com).*

MAJOR MINT ERROR PRICE LIST OF U.S. COINS	
1999 STATE QUARTER ERRORS	
<b>N.D. Statehood Quarter NGC MS-66</b> <b>Deep</b> Obverse Die Cap. Probably from 1999. This beautiful obverse Die Cap piece has very high walls for a quarter!	\$1,850
<b>1999-D Delaware Quarter PCGS MS-63</b> 180 Degree Rotated Reverse. Scarce this grade-Full 180 rotation.	\$400
<b>1999-D Delaware Quarter PCGS MS-63</b> Double Struck-Second strike 85% Off-Center. DSBS.	\$800

# Fred Weinberg's Price List of Major Mint Errors & Currency

<b>1999-D Delaware Quarter NGC MS-63</b> Struck on a <i>Nickel</i> planchet.	\$750
<b>1999-D Delaware Quarter PCGS MS-64</b> Struck on a <i>Nickel</i> planchet. (2-A)	\$825
<b>1999-D Pennsylvania Quarter NGC MS-65</b> Multi-Struck with missing area (Tag reads). This PA 25c has been struck at <b><i>least 26 times</i></b> . The main strike has 15+ strikes, and the secondary strike has @ least 11 strikes. Coin is much larger in diameter than a Sac. \$1, and approx. 20% of the plan missing. Probably the most strikes known on any States Quarter.	\$2,850
<b>1999-P New Jersey Quarter PCGS MS-64</b> Struck on a <i>Nickel</i> planchet. Comes with NGC Tag too.	\$2,000
<b>1999-P New Jersey Quarter PCGS MS-66</b> Struck on a <i>Nickel</i> planchet. Rare State only 4-5 known.	\$2,500
<b>1999-P Georgia Quarter PCGS MS-64</b> Struck 20% Off-Center.	\$200
<b>1999-P Connecticut Quarter PCGS MS-62</b> <b>STRUCK ON FEEDER FINGERS</b> - (Wt: 21.6 Grs.) The Mint no longer uses this type of Aluminum Feeder Fingers....	\$3,250

<b>2000-P Maryland Quarter PCGS MS-63</b> Reverse Clad Layer Missing. Full Red.	\$450
<b>2000-P South Carolina Quarter (s) PCGS MS-65</b> Broadstruck out of collar. (No reeding)	\$50
<b>2000-P South Carolina Quarter (s) PCGS MS-66</b> Broadstruck out of collar. (No reeding)	\$65
<b>2000-P Virginia Quarter PCGS MS-63</b> Struck 20% Off-Center-Very scarce .	\$200
<b>2001 STATE QUARTER ERRORS</b>	
<b>(2001) New York Quarter PCGS MS-63</b> Struck <b>70%</b> Off-Center @ 2:00. Until this piece recently surfaced, there were no known Off-Center New York Quarters more than 10% O/C. This is the best & farthest O/C New York Quarter known.	\$800
<b>2001 North Carolina Quarter PCGS MS-66</b> Struck 10% Off-Center. (3-A)	\$115
<b>2004 STATE QUARTER ERRORS</b>	
<b>2004-P Florida Quarter PCGS MS-65</b> Struck on a <i>Nickel</i> planchet.	\$2,000
<b>2004-P Florida Quarter PCGS MS-67</b> Struck on <i>Nickel</i> Planchet-Finest known-Highest Grade.	\$2,750

# Fred Weinberg's Price List of Major Mint Errors & Currency

<b>2004-P Florida Quarter PCGS MS-62</b> Struck 70% off-center w/F.F. contact (Tag reads). The only known off-center Florida 25c. Has Feeder Finger contact & buckled planchet.	\$1,300
<b>2004-D Wisc. Quarter's (2 pc. set) PCGS MS-66/66</b> Extra Leaf High & Extra Leaf Low 2pc. Set. Very scarce in this grade. Collector's Universe Value Price Guide \$5,750/set (2-A)	\$4,000
<b>2005 STATE QUARTER ERRORS</b>	
<b>2005-D California Quarter (s) PCGS MS-64</b> Uncentered Broadstrike (Tag reads) (Looks 5% O/C) Scarce year.	\$75
<b>2005-D California Quarter (s) PCGS MS-65</b> Uncentered Broadstrike (Tag reads) (Looks 5% O/C) Scarce State.	\$100
<b>2005-D California Quarter (s) PCGS MS-66</b> Uncentered Broadstrike (Tag reads) (Looks 5% O/C) Scarce grade.	\$115
<b>2005-Oregon Quarter NGC MS-67</b> 5% Clipped planchet.	\$200
<b>2005 Oregon Quarter NGC MS-64</b> 15% Clipped planchet.	\$220
<b>2005 Oregon Quarter NGC MS-67</b> 15% Clipped planchet.	\$300
<b>2005 Oregon Quarter PCGS MS-63</b> 18% Clipped planchet. One of the largest known.	\$250
<b>2005 Oregon Quarter NGC MS-67</b> 20% Clipped planchet. (2-A)	\$325
<b>2005 Oregon Quarter NGC MS-68</b> 20% Clipped planchet. Rare this grade.	\$400
<b>2005 Kansas Quarter (Bison) PCGS MS-64</b> 12% Double Clipped planchet.	\$335
<b>Half Dollar Errors</b>	
<b>1877-S Seated Liberty Half PCGS AU-50</b> Partial Collar strike-Not easily seen in the holder, but a very Rare coin for this type. We also believe it is a T.2 Hub (Breen pg. #408).	\$650
<b>1957 Franklin Half NGC MS-65 Full Bell Lines</b> Struck on a <i>Nickel</i> planchet. A very rare O/M-Highest graded.	\$6,250
<b>1959 Franklin Half PCGS MS-62</b> Struck on a <i>Type-I Silver Quarter</i> planchet.	\$2,250
<b>1959 Franklin Half NGC MS-63 Full Bell Lines</b> Struck on a Type-I <i>Silver quarter</i> planchet.	\$2,500
<b>1961 Franklin Half PCGS MS-63</b> Struck on a <i>Silver Quarter</i> planchet. Brilliant.	\$2,200

# Fred Weinberg's Price List of Major Mint Errors & Currency

<b>1961-D Franklin Quarter NGC AU-58</b> Struck on a <i>Type-I Nickel</i> planchet. Missing from most collections.	\$4,750
<b>1962-D Franklin Half PCGS MS-63 Full Bell Lines</b> Struck on a <i>Quarter</i> planchet.	\$2,100
<b>N.D. Franklin Half NGC MS-66BN</b> Struck on a <i>Cent</i> planchet. The finest known. Too bad-No Date!	\$7,000
<b>1968-D Kennedy Half NGC-MS-68</b> Struck on <i>Clad Quarter</i> blank. Full date-finest known O/M Half.	\$2,250
<b>1971-S Kennedy PCGS Proof-66</b> Strong Clashed Dies O & R (Tag reads). <b>INCREDIBLE STRONG CLASHED DIES OBVERSE &amp; REVERSE</b> , especially on obverse. Superb PQ Original Toning---Rare like this.	\$750
<b>197x Kennedy Half PCGS MS-65</b> Multi-Struck on Scrap-68grs. (Tag Reads). A <b>huge</b> 1 1/2" in diameter 40% scrap planchet that has been struck at least two times with the 2nd strike uniface obv. One of the largest Kennedy's seen!	\$1,850
<b>1989-P Kennedy Half PCGS MS-65</b> Multi-Struck Brockage & B/S (Tag Reads). This <b>huge</b> full Ike-sized Kennedy Half has been struck at least twice with unusual dual Kennedy obverse Brockages.-- <b>Very Dramatic</b>	\$2,150
<b>1989 Kennedy Half PCGS MS-63</b> Struck 12% Off-Center and Clashed Dies obverse and reverse.	\$185
<b>N.D. Kennedy Half PCGS MS-65</b> Struck on a <i>Nickel</i> planchet. A beautiful Lustrous Gem!	\$2,600
<b>N.D. Kennedy Half NGC MS-65</b> Double Struck on Scrap plan (Tag Reads). Similar to the 197x also listed, this 1 1/2" in diameter Kennedy on scrap is Double Struck with the second obverse strike being uniface.	\$2,250
<b>1986 Silver American Eagle Dollar NGC MS-68</b> 100% Reverse Struck-Thru. This is one of a handful of Silver Eagles that were struck thru a piece of 3-M Sanding paper disc. The dark disc is not with this piece (Only 3 known), but there are less than eight known both obverse and reverse struck-thru. Extremely rare.	\$2,600
<b>Morgan and Peace Dollars</b>	
<b>1887 Morgan Dollar NGC MS-64</b> Struck in wire rev-1/4"+ pc.of actual wire struck into rev @ 4:30.RARE	\$900
<b>1891-O Morgan Dollar NCS Fine Details</b> Struck 15% Off-Center @ 12:00. Improperly cleaned, this is still a very scarce <u>New Orleans</u> Morgan Dollar. The obverse has no problems, but the reverse has numerous dark areas.	\$2,850

# Fred Weinberg's Price List of Major Mint Errors & Currency

<b>1899-S Morgan Dollar NGC AU-53</b> Partial Collar Strike in New NGC "See Edge" holder. Scarce Date.	\$375
<b>1921 Morgan Dollar PCGS MS-63</b> Unique-Struck 5% Off-Center and Clashed Dies Reverse. This PQ 5% O/C Dollar is also VAM 40-A "Pyramid Rev Die Clash" below tail feathers. A great coin that combines grade, appearance, off-center strike, and a high grade. Scarce VAM- <b>UNIQUE</b>	\$5,750
<b>N.D. New Orleans Morgan Dollar PCGS XF-45</b> Struck 25% Off-center @ 6:00. Morgan dollars struck this far off-center are excessively rare. This coin is from the New Orleans Mint, and who's scarcity for Errors is compensated for the lack of date showing on a Silver Dollar strike this far off-center.	\$11,500
<b>N.D. Morgan/Peace Dollar PCGS MS-61</b> T-I (No Rim) Silver Blank planchet. Very rare. (2-A)	\$1,750
<b>N.D. Morgan/Peace Dollar PCGS MS-61</b> T-II (Upset Rim) Silver Blank planchet. Very rare. (2-A)	\$1,500
<b>Buy T-I and T-II Blank Silver Dollar planchets as a set for \$2,900 (Both PCGS MS-61)</b>	
<b>Ike and Susan B. Anthony Dollars</b>	
<b>197x Ike Dollar PCGS MS-64</b> Struck 30% Off-Center @ 3:00. Rare this far O/C (AC MS-65 Tag)	\$2,750
<b>N.D. "D" Ike Dollar PCGS MS-62</b> Struck on a <b>Clad Half Dollar</b> planchet.(2-A)	\$2,800
<b>N.D. "D" Ike Dollar (1971 TYPE) PCGS MS-64</b> Struck on a <b>Half Dollar</b> planchet.	\$3,100
<b>N.D. Ike Dollar PCGS MS-65</b> Struck on a <b>Clad Half Dollar</b> plan.(after 1973 Type)Highest grade.	\$3,500
<b>1980-S Susan B. Anthony Dollar PCGS MS-62</b> Obverse Clad Layer Missing. Scarcer than prior years. Nice Red.	\$375
<b>N.D. Susan B. Anthony PCGS MS-65Red</b> Struck on a <b>Cent</b> planchet. A beautiful Gem with great original luster. We recently sold an AU-58 for \$6,250.	\$7,500

# ERROR WORLD

Join the *hottest*  
**Error Coin Club on the Net!**

**e r r o r w o r l d c l u b . o r g**

The Error World on-line coin club exists for the purpose of advancing the knowledge and the field of error coin collecting.

Error World is dedicated to the promotion, discussion and dissemination of facts and ideas about error coinage, both domestic and world-wide.

Error World exists as a vehicle to bring collectors of both foreign and domestic error coinage together in a professional and relaxed atmosphere where they can exchange information, display photos and engage in lively debate about error coinage.

---

Error World is a non-profit organization with all revenues being put back into the club to provide improved services to the members of the club.

Error World will, from time to time, accept contributions from designated Patrons in the form of contest prizes, and/or cash to be used to defray club expenses.

Error World will, from time to time, attempt to obtain sponsors from the numismatic field who will bring price saving offers to Error World members.

# Frequently Asked Questions

What are “missing edge lettering” errors?

A mint error has recently been discovered on the new Washington Presidential \$1 Coins. These coins inadvertently left the United States Mint without the edge-lettering on them. The inscriptions ‘In God We Trust,’ ‘E Pluribus Unum,’ as well as the mint mark and year are absent from these errors.

This particular Washington Dollar mint error was signed by the Director of the U.S. Mint. It was authenticated and certified by NGC and is featured on the cover of Mint Error News Magazine Issue 19.
