MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our seventh year bringing you both an online PDF magazine and the Mint Error News website. There are now over 900 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, mintererrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mike Byers (mikebyers.com) has been a Professional Numismatist since 1978. He is one of the largest Numismatic corporations dealing in rare U.S. Gold, Patterns and Mint Errors. His new discoveries of major mint errors have been front page news for years. He is a life member of ANA since 1985, a charter member of NGC and a featured dealer/member of PCGS. He is a founder

member of the California Coin & Precious Metals Association. He is also a life member of the Central States Numismatic Society and the Florida United Numismatists. He is member A71 in the Certified Coin Exchange (CCE). Mike Byers was a Consultant for ANACS for Mint Errors from 2000 through 2006. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which won the NLG award for Best World Coin Book at the 2009 ANA.

Allan Levy has been specializing in Mint and Currency Errors for 25 years. His website features a diverse group of type errors, modern errors and major currency errors. He also handles regular U.S. and World coins. Allan Levy is a member of CONECA and the American Numismatic Association.

Fred Weinberg is the President of Pacific Rim Numismatics (DBA Fred Weinberg & Co.). He is a highly respected numismatist, with 35 years of full time experience in the rare coin marketplace. His professional associations include the American Numismatic Association (ANA) (38 years), the Professional Numismatist Guild (PNG) (31 years), The Industry Council for Tangible Assets (ICTA) (21 years) and The Numismatic Literary Guild. He is a past President of the Professional Numismatist Guild (1999-2001).

Mint Error News is sponsored by Mike Byers and several other mint error dealers including Allan Levy (alscoins.com) and Fred Weinberg (fredweinberg.com). Additional sponsors are Heritage Auction Galleries, CoinLink, CoinFacts.com and uspatterns.com. We encourage collectors and dealers to submit articles and photos of major mint errors that we may feature on the website.

Off-Center Mint Error Sales

by Al Levy (alcoins.com)

Off-Center Market Lincoln Wheatback Cent

Collectors are aware that most of these dates are nearly impossible to find. They are willing to substitute off centers with broadstrikes or partial collars. It is not unusual to find these error types mixed within a collection. The collector will purchase these dated error types that fill the void in their collection. Some dates take decades before one shows up for sale.

Scan through the back issues of Mint Error News to look up prices realized for the early Lincolns. The closer to the 50% off center with a full date and mintmark, the more money is paid. The color of the coin is a major price factor. Almost each quarter 1956-D and 1957-D are sold on eBay. A few sold! The ones that were offered in high grades failed to sell due to prices

asked. The major auction houses have been selling these in high grades for way more than what eBayers are willing to pay.

Since the grading services started listing problem coins as "Genuine", there has been an influx of these being offered on eBay. This site has become a dumping ground for inferior coins. Lots of scratched, cleaned and questionable items are showing up regularly. When the seller states "you grade", it might be a good time to stay away from the item. Check out the "solds" to see how many were cleaned or damaged.

I have noticed that quite a few of the previously sold off centers are being re-offered on eBay after they are marketed through a major auction house. A further observation is eBay is not bringing the big dollars that the auction houses are. I believe most eBayers are frustrated with

inferior material being purchased from eBay.

Reader of my charts must understand that some of the listings on eBay may have been overlooked. This is a guide only. What if the previous reported sale price sold because the seller listed it as a "Buy it now?" Or, the lot was misdescribed? There are numerous factors to consider when reading charts. One major thing to consider is my charts show coins sold exclusively on eBay.

The date collector knows the true market for error types. They do not follow coins sold on eBay exclusively. They frequent shows. Subscribe to most auction catalogs. Solicit error dealers with their want lists. Many times these collectors accept coins in which the percentage of off center is minor since this is all that is available.

Here are records of recent sales of off-center mint errors on eBay from October 1, 2010 to December 31, 2010.

1. All lots had buyers. If the coins actually changed hands is unknown.
2. A picture accompanied each lot or it was not recognized.
3. Mislabeled items were ignored.
4. Some lots may have changed hands more than once.
5. "D" next to the date symbolizes that the coin had damage or was scratched.
6. "C" next to the date symbolizes that the coin was cleaned.
7. "B" next to the date symbolizes that the coin had damage and was cleaned.
8. If the date or mint mark was missing or partially visible, parentheses were used.
9. Postage/handling/insurance fees were ignored.
10. Major auctions were not listed.

NORTHEAST NUMISMATICS

INC. RARE COINS · PERSONAL SERVICE

Northeast Numismatics has a million dollar plus inventory of over 3,500 certified United States and world coins. We carry every area of U.S. coinage from colonials through rare gold including proof and mint state type, commemoratives, silver dollars and much more. We also offer an extensive inventory of world coins.

Northeast Numismatics
10 Concord Crossing, Ste. 220
Concord, MA 01742
800-449-2646
www.northeastcoin.com

High quality “fresh” coins are what we are known for and take pleasure in offering. We constantly are hearing from our customers about our excellent prices and high customer service. 2003 is our 39th year of business, so order with complete confidence. Also, please keep in mind that we are always buying coins of all kinds, certified and uncertified, to fill our want lists.

Double Denomination & Off-Metal Mint Error Sales

by Al Levy (alscoins.com)

One of the most popular error types are double denominations. The high end “common dates” graded over MS65 have stabilized in price. However, the sellers are still not willing to reduce their ask price. Collectors need to realize that for some dates and mintmarks only a handful are known to exist. Eye appeal will generate a higher price paid than a grade.

When a new seller lists this error type and does not uti-

lize quality pictures or descriptions, they sell for a fraction of their real value. Refer to the notes attached to the sold item. Prices have not dropped. It means the buyer may be able to turn a quick profit by reselling it. Keep in mind that eBay sales are a small fraction of the true error coin market. Dates, mintmarks and grading services all make a difference in value. Read over my notes to help you decipher the real market.

Here are records of recent sales of off-center mint errors on eBay from October 1, 2010 to December 31, 2010.

1. All lots had buyers. If the coins actually changed hands is unknown.
2. A picture accompanied each lot or it was not recognized.
3. Mislabelled items were ignored.
4. Some lots may have changed hands more than once.
5. “D” next to the date symbolizes that the coin had damage or was scratched.
6. “C” next to the date symbolizes that the coin was cleaned.
7. “B” next to the date symbolizes that the coin had damage and was cleaned.
8. If the date or mint mark was missing or partially visible, parentheses were used.
9. Postage/handling/insurance fees were ignored.
10. Major auctions were not listed.

DESCRIPTION	GRADED	SOLD	OBSERVATION
DOUBLE DENOMINATIONS			
1978-D STRUCK CENT ON A STRUCK DIME	UNC	\$714.10	45 DEGREE CCW TURN BETWEEN STRIKES. FULL DATE & MM DIME STRIKE. "197" SHOWS ON CENT STRIKE.

2005-P STRUCK NICKEL ON A STRUCK CENT	NGC 68 RED	\$5,650.00	LOTS OF DETAIL REMAIN FROM 1ST STRIKE. TWO FULL DATES + MM.

Double Denomination & Off-Metal Error Sales

There are date collectors for off metals. Completing this may not be possible. For the collector that has been looking for specific dates to come on the market may have been waiting for decades. So, it is not unusual to see an MS64 example sell for the same price as an AU55. If you do not stretch for this coin, it may not show up on the market for another decade.

Off metals have a very high eye appeal. Cents struck on dime

planchets have always peaked collectors interests. Same with nickels or quarters struck on cent planchets. Check out the price variance between an example that sells that has a brown color to one that is a full red. The red coin may bring twice the price due to EYE APPEAL!

Multiple errors on off metals are highly desirable. There may only be one example of an off metal struck off center. Or, double struck plus off metal.

Our new CD-Rom is a mirror image of the CoinFacts website but with no download delays caused by slow Internet connections. In fact, no Internet connection is required at all, making the CoinFacts CD-Rom perfect for use in your home, office or even your portable computer at coin shows. Plop the CoinFacts CD-Rom in your PC and have immediate, lightning-fast access to the thousands of full color images and indispensable numismatic information. Please visit CoinFacts.com for more information and to purchase.

Double Denomination & Off-Metal Error Sales

Common are the 25c 1970-D on 10c stock planchet. Try and find examples for other years or on other denominations. These are very under rated and under valued error types. Some collectors hope to determine that these errors are actually struck on a foreign blank.

Check out the price differences for the 1970-D 10c struck on dime stock. The better the picture, the higher the bid. When the seller lists the coin

and states: "You Grade It", chances are the coin was cleaned or scratched. (Some of the grades listed below are a guess on my behalf.)

The problem with eBay, there are many coins being sold as off metals, off stock. See my chart below "Counterfeits/Questionable errors". eBay has become a real "Dump and Run" auction site.

DESCRIPTION	GRADED	SOLD	OBSERVATION

Clad Layer Split-Off Mint Error Sales

by Al Levy (alscoins.com)

“Clad layers off” are very popular due to the statehood quarter issues. There are a few collectors trying to complete a type set of obverse and reverse. This inflates the market on a temporary basis. Once the hole in their collection is filled, additional examples sell for way less. Compare this quarters’ sales to last quarters’ for the statehood quarters. Good example how sale prices lowered. If the coin shows a red copper

color, it will bring a very high price compared to a brown. Buyers on eBay must be careful when trying to purchase these by scan only. Some pictures have been doctored and the sellers do not grade or describe these coins. Therefore, the information listed below may not be 100% accurate. The buyers must ask questions prior to bidding. Such as: What is the weight? Is the color natural? What is your return policy?

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

DESCRIPTION	GRADED	SOLD	OBSERVATION
10c 1968 OBVERSE	BU	\$60.00	RED COLOR. NO WEIGHT GIVEN. (DEFECTIVE PLANCHET)

The Society of U.S. Pattern Collectors is dedicated to the study of many of the rarest coins struck at the U.S. Mint: patterns, die trials and experimental pieces.

Wisconsin Quarter “Extra Leaves”

by Al Levy (alscoins.com)

Last quarter I reported that the low and high leaf Wisconsin quarters were selling around the same price level. This quarter the prices have increased. Still, hundreds of these listed remain unsold. The High Leafs are suppose to be the rarest. The price variance between the high and low changed this quarter. High leaf quarters jumped in price compared to last quarter. Low leaf slightly increased. Still, many of these varieties that were listed, remain unsold. The market is soft.

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

WISCONSIN 2004-D: HIGH LEAF

Waffled Coin Sales

by Al Levy (alscoins.com)

Waffled coins. These are a very interesting type. The grading services will body bag coins damaged or cleaned. However, if the Mint waffles them, they show up holdered an even graded. Now that more "bins" have been bypassing the smelters pot, prices have really been dropping. There are collectors trying to put together complete sets of the statehood quarters and Presidential dollars.

The original slabbed coins had the insert state the coins were "Waffle

Cancelled". The newer slab's insert read "Mint Cancelled". They should all be tagged as "Genuine." All are damaged intentionally.

Bin fulls of "Red Tanks Marked - Sweeps" hit the market. This was previously reported as a rumor. Looks like it came true. One reason there are so many of the "webbings" available. Bowtie scrap is being sold by the pound. Proof issues are starting to show up. These are being offered to dealers at major conventions.

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

Blank Planchets

by Al Levy (alscoins.com)

Blanks are very popular. But, buyer beware. Many of the blanks selling on eBay are of foreign origin. The Mexican 50 Pesos is a good example as it resembles a USA half dollar. These are being marketed as 90% silver blanks. Another thing to watch for are US silver dollar blanks. The ones being offered may actually be blanks intended for bullion. Buyers must ask questions prior to purchasing. Ask the seller for edge descriptions. Also, weight.

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

Rotated Reverse

by Al Levy (alscoins.com)

Most rotated reverse errors listed on eBay the seller fails to mention the percentage of rotation. Other times, no mention if they are clockwise (CW) or counterclockwise (CCW). The grading services omit the same information on their labels. Many of these sold have been ignored as I do not have the time trying to figure out what actually sold. Grading

services may only list that the coin has die rotation with no degrees notated. Medalllic rotation means the reverse is rotated 180 degrees. The most desirable rotated coins are the Morgan and Peace dollar series. These bring very strong prices. Two cent pieces are the opposite, as they are very common in degree of rotation and are easily found.

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

Double Struck Double Dated

by Al Levy (alscoins.com)

A very underrated error type is the double strikes with two full dates and mintmarks. Only recently have these error types been bringing strong prices. Not only are they rare, but the coins have a special eye appeal. Find a Lincoln cent that is a full red color with a flipover 2nd strike, and the date and mintmark shows on both sides. Watch what the coin sells for. Triple strikes with two or more dates are also bringing strong prices.

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

Other Sales Worth Mentioning

by Al Levy (alscoins.com)

This grouping of sales consists of items sold that normally are not found priced in any of the grey sheets. Nor, can be found in published books showing specialty items. If prices are listed in books, when the book hits the market, these prices are out of date.

Many of these lots are third party slabbed and graded. Others, may be too big to fit in holders due to the error. Or, multiple errors not found or listed anywhere else. Currency and foreign errors are also included.

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

Counterfeit & Questionable Errors

by Al Levy (alscoins.com)

Almost every day there are items listed for sale that are “questionable”. Some are counterfeits, others may be altered to resemble errors. Some collectors buy these knowing what they are. If cheap, these fit into the person’s collection. Other buyers are just taken.

Legitimate errors sold on eBay have overall come down in price. A few obvious reasons is the “Junk” marketed on this site. The “Chinese Counterfeit” scarce is enough to have collectors stop buying. Once a collector is taken,

it is more than likely they will purchase from anyone off eBay.

The lot number along with the sellers’ description have been included in each of my notations. I have included my opinion as to why these items are placed in this grouping. If anyone reading this disagrees with me, please let me know.

Lots with sales under \$10.00 are ignored.

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

DESCRIPTION	GRADE	PRICE	ADDITIONAL INFORMATION

Presidential Dollar Mint Error Sales

by Al Levy (alscoins.com)

Missing edge lettering: The George Washington dollars have dropped in value since my last report. John Adams dollars remain unchanged.

The double edge lettering John Adams dollars are changing hands at lower prices. PCGS and NGC prices dropped slightly. Raw examples dropped in value. A few Satin Finish examples have shown up on eBay that are MEL. Only a few of these are known with the collector choosing to ignore them or pay a very low price.

Various other Presidential smooth edge dollars that are Unc and (SMS) satin finish are being offered. These Satin Finish examples are found in Special Mint Sets that are suppose to be scrutinized

by the mint employees at each process.

In 2009, the Sacagawea dollars started have edge lettering. For 2009 and 2010, some examples of MEL's are showing up.

Partial edge lettering and weak edge lettering errors have all gone down in price. This includes the ones found in (SMS) special mint sets.

Some rare examples of missing edge lettering (MEL) are selling cheap. One reason, they are not real examples of the error. Buyer beware!!!

Here are records of recent sales on eBay from October 1, 2010 to December 31, 2010.

George Washington

World's Greatest Mint Errors

*A Guide to the Most Spectacular
Major Mint Error Coins*

Mike Byers

PCGS Certifies 1905 Indian Cent Struck On A \$2½ Gold Planchet

by Mike Byers (mikebyers.com)

From The Heritage Auction Listing:

Exactly five Indian cents are known on gold planchets, according to information available to us. Among them are three dated 1900, this piece dated 1905, and an example dated 1906. The Judd pattern reference lists 1900 and 1907 gold cents in the section on mint errors. However, Andrew W. Pollock, III, listed the 1900 gold Indian cents as P-1990 in the regular pattern section of his reference. Pollock writes: "Listed in Judd as a mint error, but it is difficult to imagine that a Mint employee would be so careless as to feed gold planchets into a coinage press fitted with one-cent piece dies." Pollock suggests that these pieces may have been deliberately struck for one or more collectors.

The following Census of gold Indian cents and additional information about them is compiled from a variety of sources, including www.uspatterns.com <http://www.uspatterns.com>, www.minterrornews.com <http://www.minterrornews.com>, Donald Taxay's 1976 Catalogue and Encyclopedia, Andrew Pollock's 1994 United States Patterns and Related Issues, the Judd reference, and selected auction catalogs. Conversations with Fred Weinberg and Richard Snow provided additional background.

1900 MS65 PCGS. Col. E.H.R. Green; B.G. Johnson; John Beck (Abner Kreisberg Corporation, 1/1975), lot 609; Mike Byers; Auction '89 (Superior, 7/1989), lot 856; Bowers and Merena (8/1991), lot 4103; recently PCGS authenticated as a 1900 Indian cent struck on a gold \$2.50 planchet, and graded MS65. The 1991 ANA catalog gives a weight of 65.8 grains, 1.3 grains too much for a quarter eagle planchet.

1900 AU55. Heritage (8/1993), lot 8000. The 1993 ANA catalog gives a weight of 4.35 grams (67.12 grains), 2.62 grains too much for a quarter eagle planchet.

1900. Michael Hodder reported in a May 14, 1996 letter to Q. David Bowers that he had personally seen three different pieces, all with weights in the range of 65.8 to 67.1 grains. See Bowers' A Buyer's and Enthusiast's Guide to Flying Eagle and Indian Cents, p. 427.

1905 MS64 PCGS. Apparently unknown to the numismatic community prior to the current offering. Weight: 64.5 grains, the standard weight for a quarter eagle planchet.

1906 AU58 NGC. Stack's (6/2004), lot 4097; Stack's (9/2009), lot 4299. Weight: 64.4 grains, within the 0.25 grain tolerance for a quarter eagle planchet.

PCGS Certifies 1905 Indian Cent Struck On A \$2½ Gold Planchet

1907. Listed in the Judd pattern book, and in Donald Taxay's Catalogue and Encyclopedia [of] U.S. Coins. The 1907 gold Indian cent is currently unlocated.

One example dated 1900 is also known in silver, from the identical dies as the 1900 gold Indian cents, suggesting they were all made at or near the same time. Rick Snow writes in A Guide Book of Flying Eagle and Indian Head Cents that "both the silver and gold examples are

struck from the same dies, with light roughness on the reverse die, probably from die rust." That all three 1900 pieces have higher weights suggests that they were specially made, perhaps without the knowledge of Mint officials. Fred Weinberg explained to this cataloger that "the weights vary because in all probability, they were on planchets that might not have been filed down to the proper weight spread." Hand adjusting of individual gold planchets continued in the Mint until circa 1910.

PCGS Certifies 1905 Indian Cent Struck On A \$2½ Gold Planchet

Those three pieces are almost certainly fancy pieces made for collectors, while the 1905 and 1906 examples, on correct weight planchets, are more likely pieces truly made in error, and substantially more important as such. This example is slightly off-center toward 9 o'clock, the tops of UNITED STATES off the planchet. The strike is weak at the date, feather tips, RICA, the outer parts of the wreath, and the ribbon bow. The weakness seems counter to expectations of the soft gold, but the diameter

is at least a full millimeter less than an Indian cent, meaning that the metal flowed out and was insufficient to accept the design from the deepest recesses of the dies. Both sides have fully brilliant yellow surfaces with frosty mint luster. A few faint hairlines on the cheek prevent a Gem grade assignment. This stunning gold Indian cent is one of the truly amazing error coins we have ever handled.

5 Crowns Struck In Gold

Fred Weinberg & Co.

Member: Professional Numismatists Guild; Professional Coin Grading Service; Industry Council for Tangible Assets.

January 24, 2008

Here is the information regarding the 5 pc. Proof Gold Pattern Isle of Man Cat Coins.

Of the five (5) Gem Proof 1 oz. Pattern Gold coins, only one was approved as a final production piece for the SILVER and COPPER/NICKEL Cat series. Derek Pobjoy said that he had to produce five (5) designs to be presented to the "Lord of the Exchequer", who would in turn show them to the Queen, and she would then approve one of the designs. The final design for the Silver & Copper/Nickel issues mentioned above is included in the group of five (5) pieces.

Please note that these all say "1 Crown". The words "Fine 1 oz. Gold" is not on these Patterns. That makes all of them in Gold, including the adopted design, quite different from the normal Proof Gold issues of 1988. The first Cat coin was issued in 1988 showing the Manx cat. All subsequent issues show a "privy" mark on the Manx cat in the background fields. I was pleasantly surprised with the Gem quality of these most unusual patterns, struck twenty years ago.

I hope the above information will be useful, and should be kept with the set of coins.

Fred Weinberg

World Errors

by Martin Wettmark

I recently purchased this 2006 2 Taka from Bangla Desh. It was struck on a 2 Cent Euro planchet. According to the previous owner it comes from the Pessac a Paris mint. It is the first euro/non-euro transitional error coin I have encountered.

2006 Bangla Desh 2 Taka Struck on a 2 Cent Euro Planchet

WORLD PAPER MONEY ERRORS

Editor's Note: Zyrus Press publishes a new book on World Paper Money Errors.

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

New From Krause Publications: Strike It Rich With Pocket Change *Error Coins Bring Big Money*

by Brian Allen & Ken Potter
NEW Second Edition

This is the long awaited second edition to this Numismatic Literary Guild Award Winning book! It covers important die varieties and errors known on United States coins from cents through dollars that can still be found in pocket change! It is the most in-depth work of its kind covering, doubled dies, repunched mintmarks, over mintmarks, abraded die varieties, mules, counter clashes, transitional errors, rotated reverses, edge lettering errors on Presidential dollars, die design changes, striking errors, planchet errors, etc. Expanded to include 50 more pages than the first edition, it spans 320 pages with over 800 photos show-

ing you where to look and what to look for on every single variety coin listed. It contains important information including updated values of the coins and important cross reference listing numbers to the most

popular listing services out there. It also contains important chapters on worthless forms of doubling often confused with valuable types of doubling, grading coins, tools of the trade, coin preservation, a treatment on minor varieties, a chapter on common myths associated with error-variety coins, how to buy and sell, finding States Quarter Errors and Varieties, terms and definitions, recommended reading, joining clubs and more!

NGC Certifies Newly Discovered Platinum Eagle Variety

By Dave Camire (ngccoin.com)

A 2007 W platinum \$100 piece in proof with an obvious die-polishing error has been found.

The latest oddity to surface in the U. S. Mint's American Eagle Bullion Coin series is a 2007-W platinum \$100 piece in proof with an obvious die-polishing error. This popular coin type, which features a facing eagle with wings outstretched, also includes a shield on the eagle's breast. Draped over this shield is a banner inscribed with the W mintmark at left and the word FREEDOM at right. On dies having a normal polishing pattern, this incuse word displays the same brilliant finish as the coin's fields, thus standing out within the frosted banner. The newly-discovered variety has the word frosted so that it blends in with the rest of the design. Presently unique, this curious coin has been certified by NGC as PF-70 Ultra Cameo, and it's also identified on the label as FROSTED FREEDOM and DISCOVERY SPECIMEN.

The 2011 edition of R. S. Yeoman's A Guide Book of United States Coins illustrates this coin type with a U. S. Mint-generated rendering that indeed shows the word FREEDOM frosted, as on this error coin, but

that illustration is believed to be a conceptual drawing that predated actual production. With evermore of the Mint's die preparation becoming automated, it's likely that this die simply missed the step which normally would have polished the incuse lettering to a mirror finish. Though the present coin is the first example found with a uniformly frosted finish to the banner, it's likely that others must have been struck, and collectors are urged to examine their 2007-W proof platinum \$100 coins for additional specimens.

Another Platinum Eagle Frosting Error Surfaces

By Dave Camire (ngccoin.com)

The word FREEDOM is frosted instead of brilliantly polished.

Last month's newsletter included an announcement that NGC had certified a proof platinum American Eagle \$100 one-ounce piece coined from dies on which the word FREEDOM had been erroneously frosted. The coin was discovered by Jason Fishman, who submitted

it to NGC, and we urged readers to examine their own coins for additional examples. Before any such reports came into us, another denomination of this coin series turned up here for grading and confirmation of the frosting error. Like the other example, this one is a 2007-W proof platinum piece, but it is the quarter-ounce \$25 issue. The incuse letters in FREEDOM appear

on the banner draping the shield on the reverse of this coin type, and the letters are supposed to be brilliantly polished, appearing in silhouette against the frosted banner. In this new discovery there is absolutely no trace of brilliant surface within the letters, and they clearly were given the same frosted finish as the rest of the eagle motif.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and be either patterns or pre-1840 gold coins.
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Byers Numismatic Corp charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

ANACS is the Collector's Choice because we know what counts: knowledge, integrity, and service. How much we value coin collecting is evident in our work.

The ANACS team enthusiastically works to advance coin collecting by offering unequaled expertise and developing new services.

This makes ANACS the choice of hobbyists, professional numismatists, and dealers. We are the coin grading service to contact when you want to know all the details about your coin's authenticity and grading.

Mint Error News Price Guide

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,500 - \$2,500	\$1,000	\$4,000	\$1,500 - \$3,000	\$500

Broadstrikes

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Mint Error News Price Guide

Partial Collars

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Coins Struck on Feeder Finger Tips

After a recent tour of the U.S. Mint in Philadelphia, it was discovered that the minting process had changed to some degree. One of the changes was that “feeder fingers” were used during the striking of all denominations of U.S. coins. Prior to this tour, U.S. coins that were struck on feeder finger tips were authenticated and described as being struck on aluminum scrap. Coins from all modern denominations have been discovered that were struck on the tips of these feeder fingers.

Struck Fragments

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Mated Pairs

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Transitional Errors

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

U.S. Gold Errors

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center

Indents

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Denomination	Struck On	Circulated	AU	Unc

Brockages

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Off-Metals

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Counterbrockages

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Fold-Over Strikes

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Martha Washington Test Pieces

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem

COINLINK™

Your Source for Daily Numismatic News and Resources on the Web

Search:

CoinLink operates on one simple principle...

To provide the numismatic community with access to the “best” numismatic information, news and resources on-line.

CoinLink® was started in 1995 by Anteater Design Group Inc., and is headquartered in Longwood, Florida (just northeast of Orlando).

For over 12 years we have been proud to operate the most popular and comprehensive numismatic directory on the web, referring collectors to thousands of numismatic sites, and providing unbiased access to resources that are informative and relevant to collectors and dealers alike.

The reason for our success has been a willingness to listen to our users suggestions and provide innovative solutions to aggregating the diverse and ever changing sources of numismatic information available.

CoinLink does not buy or sell coins. We have NO commercial or financial interest in any company that does. We do NOT compete against our advertisers.

Rather, our goal is to provide a platform from which dealers and collectors can find each other and stay informed about what is happening within the marketplace and within the hobby.

As we move into our 12th year of operations, we want to thank all of the users, supporters and sponsors who have made CoinLink what it is today, and who continue to shape the direction in which CoinLink will grow in the future.

Scott Purvis - President
Anteater Design Group Inc.

Gold	
1847 \$5 Liberty No Motto PCGS XF-45	\$1250.00
Retained Cud @ 8:00 Rev-Retained Die Break in collar (Tag Reads). Quite Rare & Easily Seen.	
Currency Errors	
1969 \$ 20 Note PCGS Very Fine 30	\$300.00
Mis-Aligned overprint one-third of District Seal, two numbers, and suffix are into portrait. (Scans available upon request).	
1969-C \$ 10 Note PCGS Gem New 66 PPQ	\$550.00
Mis-Aligned print. Half of Black District Seal, four numbers, and suffix are into portrait. A High Grade Gem. (Scans available upon request).	
1969-D \$1 PCGS CH. About New 58 PPQ	\$2250.00
Additional face printing- A double printed front second printing, with two different plate numbers. Very dramatic-Good separation. This Dramatic Double Printed Note will make you dizzy.	

1977 \$20 PCGS Very Choice New 64 PPQ	\$3500.00
Mis-Aligned Overprint ~ The most shifted third printing I've seen! The Green Seal is DIRECTLY over Jackson's head and Black District Seal almost touches border on left side. The right Serial Number is dead center on middle of note, suffix , and 2 1/2 Serial numbers from NEXT note on the right is on the note on the right border. A similar 1999 \$20 Federal Reserve Note in Extremely Fine brought \$3,450 in 2/2005	
2001 \$1 PCGS Choice About New 58 PPQ	\$650.00
Mis-Aligned Overprint~A dramatic major 3rd printing shift to the left & angled. The green Seal is directly over "Series" on right side. Very Eye-Catching!	
Wold Errors	
1983 Israel Medal NGC MS-67	\$1150.00
On Two Bonded Canadian 50¢ (Tag Reads). "Jerusalem of Gold" (TR). Large, Deep and Unique in new NGC thick holder & photo.	
2006 Chile 50 Pesos PCGS MS-65	\$1650.00
Struck 20% Off-center on 1985 Mexico 5 Peso coin. UNIQUE! This 24 year-old 1985 Mexico 5 Pesos coin was struck in 2006 20% off-center with Chile 50 Pesos dies. Both dates (1985 and 2006) show. Probably a helped coin, but still unique & dramatic. Comes with normal Chile 50 Pesos coin for comparison.

Coin Auctions Help

U.S. Coin Information - Guides - News - Forum

Coinauctionshelp.com is not a coin auctions website, but help for United States coin collectors who do buy coins at online auctions, but we are still much more than that. Besides being the fastest growing coin site on the web, we offer coin guides, facts, news, pictures, price guides, third party grading information, coin site links, and targeted ebay coin auctions for every major U.S. Coin series minted. If you can't find the coin or information you need, send us an email and we will send it to you and add it to our site. Let us do the research for you!

Targeted Coin Links:

First, let's talk about our targeted ebay coin auctions. Simply put, we do the ebay coin auction search for you. We spent months building links at ebay for every U.S. Coin series, and often for each date in the series. We did our best to eliminate irrelevant coin auctions so the user can click a link and go directly to only the coin type or date they wish to buy.

Although, our searches are not perfect because some coins are so rare that they are not listed on ebay often, and there are many sellers on ebay that use keyword spamming in their ebay auctions. However, most of our searches have eliminated this problem, so you don't have to spend hours trying to find the exact coin you need for your collection.

Plus, the sales generated from these links allow us to continue providing all the free information on this website.

If a certain date is not listed on ebay after you click a link, it means one is not listed at the present, but might be in the near future. So always check back often so you don't miss out on an opportunity for that rare and valuable coin!

Facts And Pictures:

We offer a page for every U.S. Coin series. A list of the page links can be found by clicking the Coin Facts tab on the navigation bar. Our coin facts pages offer the collector large pictures with important features pointed out so the mint mark, designer initials, denomination, and other design elements to allow for proper identification of coin type and varieties of that coin series. Also, each page contains important facts about the coin type, a list of rare and valuable dates for "cherry pickers", a price guide and the targetable links we mentioned earlier.

We add new information to these pages often, and at site visitors request. So check back to see what's new or ask to be added to our email list and receive email updates and contained in our Newsletter.

Coin News And Guides:

Although, we offer the latest U.S. coin news on our homepage, we don't limit the reporting to just what everyone else reports, but we find news that other site ignore or don't know about yet. Often, we will have a news articles posted on our site before the latest issue of Coin World comes out!

We offer news for latest auction sales, mint error discoveries, third party grading services, and offer guides on featured coin types, mint errors, fake coins, cleaning and identifying cleaned coins, grading coins, and many more guides to help the collector be better informed. Basically we report on the major sales and finds, and on the obscure news which allows us to offer our readers news and guides they can't find anywhere else.

In conclusion, this is about us in the brief, but in no way describes what we do completely as we our always updating and adding to coinauctionshelp.com to make the coin collector's hobby more informative, exciting and safe. We gladly answer questions and take suggestions because only you, the visitor, know what makes a good coin site, a great coin site.

MINTERRORNEWS GLOSSARY

What are Broadstrikes?

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it. Pictured above is a rare date 1897-S Barber Half Dollar broadstruck.

Fred Weinberg & Co.

Dealer in Major Mint Error Coins & Currency

fredweinberg.com

BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.
