MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our thirteenth year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,000 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over thirty-five years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.com.

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace. He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types. He is one of the original 31 dealers selected as an authorized P.C.G.S. (Professional Coin Grading Service) dealer at it's inception in 1986.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions. Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

NGC Certifies 1904 \$20 Double Struck Rotated 180 Degrees in Collar

by Mike Byers (mikebyers.com)

Major mint errors on U.S. gold coins are extremely rare. There are only a few known that are double or triple struck. One phenomenal example is this double struck 1904 \$20 rotated 180 degrees in the collar. Considerable detail remains from

the initial strike and is visible under the portrait on the obverse and the eagle on the reverse. This exciting mint error was in my person collection and has been authenticated and certified by NGC and BYERS COLLECTION is noted on the insert.

NGC Certifies 1904 \$20 Double Struck Rotated 180 Degrees in Collar

A different double struck 1904 \$20 gold piece with slight rotation sold a few years ago for \$100,000. It was authenticated and certified by PCGS MS 63. Also recently, a \$2 1/2 Indian double struck rotated 180

degrees sold for slightly over \$66,000. This double struck \$20 Liberty combines the high denomination and large size with dramatic eye appeal and it is unique for being rotated 180 degrees.

NGC Certifies 1904 \$20 Double Struck Rotated 180 Degrees in Collar

NGC Certifies 1904 \$20 Double Struck Rotated 180 Degrees in Collar

NGC Certifies Unique Double Denomination

by Mike Byers (mikebyers.com)

Unique Double Denomination

This is a spectacular double denomination. It is a 1995 Lincoln Cent struck on a struck 1991 Roosevelt Dime. It's unique since it's a double denomination that is 4 years apart.

The Lincoln portrait is almost entirely visible over the Roosevelt Dime reverse design making this one of the most visually dramatic

and eye appealing double denominations known. The Roosevelt portrait is still almost entirely visible underneath the memorial design of the Cent. Both dates are clearly visible as well. It is in gem mint state condition, well struck and is one of the most fascinating United States mint errors known.

Unique Double Denomination

BALTIMORE COIN SHOW REPORT

- JULY 2016 -

by Jon Sullivan

The Baltimore Whitman coin show was a decent show this July, although as with all summer shows they aren't nearly as active as shows held at other times of the year. It was "as expected", with moderate buying and moderate selling, but overall satisfactory with enough of both activities to make the show well worth attending. Some of our regular customer were there,

although a good number were not in attendance--probably due to vacations and summer activities keeping coins on the back-burner for them. Also, the summer Baltimore show has no major auction, and that takes some of the excitement and buzz out of the show. But to reiterate, it was worthwhile, and if you have a chance to come next year, consider adding it to your show calendar.

BALTIMORE COIN SHOW REPORT - JULY, 2016

Above: Our table at the show.

We purchased a few high end coins, and a moderate quantity of less expensive errors. These will be coming here to the website in the coming weeks. One coin of particular interest was a 1964 Lincoln cent struck on a cancelled

India 1/4 rupee, which is excessively rare, and super eye-catching. A few off-metals, some minor off-centers and cheaper errors, and miscellaneous other coins rounded out our purchases. If you're signed up for our mailing list, we will send our customary email out when these get listed on the website.

BALTIMORE COIN SHOW REPORT - *JULY, 2016*

Above: one of the coins we purchased at the show: off-metal 1963 Washington quarter struck on a silver Roosevelt dime planchet.

BALTIMORE COIN SHOW REPORT - JULY, 2016

We were the only dealer at the show who specializes exclusively in mint errors, and that probably helped make it a decent show since we were offered most of the error coins that dealers or collectors were wanting to sell. In discussing the show with non-error dealers, the general theme seemed to be that buying was good, selling was bad (wholesale or retail), and that prices are soft for all but unusual or nice coins. Of course there are exceptions, and we had a few dealers tell us that sales had been surprisingly good, and they had moved a good number of coins. Overall the coin market seems to be soft but holding up reasonably well, particularly for nice coins. If a coin is relatively common (in other words, easy to find for sale), the prices are generally soft. This is a good time for collectors to be building their collections—as the saying goes “buy low, sell high”, and that is appropriate for the current state of the coin market. Buy selectively, but buy.

Above: The show was well attended, and there was a decent “buzz” of activity on the bourse floor.

There was a lot of talk on Thursday and Friday about protestors, which were supposed to be protesting about a block from the convention center on Friday at 7 PM. The coin show staff decided to close the show on Friday 2 hours early out of an abundance of caution, but even that turned out to be unnecessary, as nothing happened at all. After the rioting which happened a year or so

BALTIMORE COIN SHOW REPORT - *JULY, 2016*

ago (not at the coin show of course, but just in Baltimore in general), a number of dealers (maybe 1/5th) left the show this year early, afraid that events might take a turn for the worse. Their empty booths dotted the show coin show floor. However, nothing happened, and all they did was miss out on a decent coin show.

It was nice to see some of our regular customers, do some buying and selling, and talk coins with fellow dealers and collectors. In an

age of coin collecting where most buying and selling is done online, it is great to go to coin shows and be around fellow collectors and dealers to do business and talk coins. If you've not attended a coin show in a while, take the time as there's nothing like it.

For those who will be at the ANA Convention in Anaheim, California next month, we look forward to seeing you at our table!

Saul Teichman's Want List

I am looking for the following off-metal errors:

- Ike Dollar on a Nickel Planchet
- State Quarter on a Dime Planchet
- Bicentennial Ike on a Half Dollar Planchet
- Sacagawea Dollar on a Cent Planchet
- Sacagawea Dollar on a Nickel Planchet
- Sacagawea Dollar on a Dime Planchet

Saul.Teichman@ey.com

PCGS Certifies Unique Proof Canadian \$15 Struck on a \$50 Maple Leaf 1 oz. Gold Planchet

by Mike Byers (mikebyers.com)

This is one of the rarest, most expensive and spectacular Canadian mint error coins known.

PCGS Certifies Unique Proof Canadian \$15 Struck on a \$50 Maple Leaf 1 oz. Gold Planchet

This proof gold off-metal mint error was certified and authenticated by PCGS. It was struck on a \$50 Gold Planchet weighing 31.1 grams that was intended for a 1 oz Maple Leaf gold coin. It was unknown to the numismatic community prior to being certified by PCGS. It is the size of a U.S. Silver American Eagle and is in superb proof cameo condition. The diameter of a regular 1 oz Maple Leaf gold coin is 30mm and it has a thickness of 2.8mm. This gold off-metal mint error expanded to a diameter of 40mm when it was struck.

The International Olympic Committee decided to commemorate the centennial of the Olympic Games. In 1992 the Spirit of the Generations proof silver coin was issued by

the Royal Canadian Mint and released in a special presentation box. These were struck with CITIUS ALTIUS FORTIUS on the edge.

For comparison, there are two known smaller Canadian Dollars struck in gold by the Royal Canadian Mint. These two were special gold strikings of silver commemorative coins and were sold on eBay by the Royal Canadian Mint. They were the size of a Kennedy Half Dollar and sold for approximately \$50,000 and \$75,000 (U.S. Dollars).

Also for comparison, there is one known 1992 Canadian \$15 proof commemorative coin authenticated and certified by NGC as a Gold Off-Metal Strike of the same Spirit of the Generations commemorative

PCGS Certifies Unique Proof Canadian \$15 Struck on a \$50 Maple Leaf 1 oz. Gold Planchet

issue. The NGC gold off-metal strike was featured on the cover of Issue 35 of Mint Error News Magazine and also featured in an article in Coin Week.

This 1992 \$15 unique Canadian mint error is twice the size of the two special gold strikings that sold on eBay. This proof gold off-metal rivals any U.S. mint error coin. For comparison

purposes, several U.S. Indian Head Cents struck in gold on \$2 1/2 Dollar blanks and certified by PCGS and NGC as mint errors have sold in public auctions from approximately \$275,000, \$250,000, \$140,000 and \$100,000. This amazing gold off-metal would be the centerpiece of any collection of Canadian mint error coins or commemorative issues.

For comparison, here is the regular issue in silver (left) and a 1 oz Maple Leaf gold coin (right). The silver issue has a diameter of 40mm, and the 1 oz Maple Leaf gold coin has a diameter of 30mm. The above image shows the dramatic size difference. The size of every off-metal mint error expands in diameter when it is struck, usually by a small percentage. In this case, the Maple Leaf gold planchet expanded 25% from a diameter of 30mm to a diameter of 40mm. The die pressure caused the soft metal of the gold planchet to expand in the collar to the full diameter of the regular silver issue.

PCGS Certifies Unique Proof Canadian \$15 Struck on a \$50 Maple Leaf 1 oz. Gold Planchet

PCGS Certifies Unique Proof Canadian \$15 Struck on a \$50 Maple Leaf 1 oz. Gold Planchet

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit krausebooks.com for more information.

PCGS Certifies Walking Liberty Half Struck 50% Off-Center Finest Known & Most Off-Center

by Mike Byers (mikebyers.com)

This is the finest known and most off-center Walking Liberty Half.

PCGS Certifies Walking Liberty Half Dollar Struck 50% Off-Center - Finest Known & Most Off-Center

It is struck 50% off-center and is die struck on both sides, not a uniface reverse. Off-center Walking Liberty Halves are RARE. There are only a few known. Until this spectacular off-center was discovered, there was nothing like it anywhere. PCGS authenticated and certified it 50% off-center MS 63.

The next finest known drops to a 40% off-center in VF condition, certified by ANACS. Years ago I sold this mint error for over \$25k. After that there are a couple that are 15%, 10% and 5% in various grades.

In comparison, Morgan Dollars that are struck 20% to 50% off-center are very scarce but not rare. A 20% off-center Morgan Dollar is currently being offered on eBay and on another mint error dealer's website for \$33,500. I estimate that there are over 15 Morgan dollars that are 20% off-center or more, compared to just these 2 Walking Liberty Halves off-center.

This is an extremely rare major mint error, and the finest known on a Walking Liberty Half Dollar.

PCGS Certifies Walking Liberty Half Dollar Struck 50% Off-Center - Finest Known & Most Off-Center

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

Error Coin Information Exchange

The Error Coin Information Exchange (ECIE) is a freewheeling forum dedicated to the study of error coins and varieties. Founded and hosted by veteran writer and researcher Mike Diamond, it is a great place to visit, whether you're an established collector or a novice. ECIE is not flashy and doesn't waste your time with a message board clogged with idle chit-chat. It simply provides the best information on error coins available on the web. Here you can read about late-breaking developments; find out about the newest discoveries; listen or participate in spirited debates about how error coins are produced; test your skills with periodic quizzes and brain-teasers. ECIE proudly maintains an atmosphere of skeptical inquiry. Here, no claim goes unchallenged and no theory goes untested. This is the best place to find out what kind of error you really have, how it was created, and the extent to which it is rare or unusual.

Policy Statement: By design, ECIE does not attempt to develop partnerships with dealers, grading services, or auction houses. It neither seeks, nor encourages, discounts, promotions, giveaways, or advertisements. To do otherwise would create a conflict of interest that could compromise the fierce independence and impartiality that distinguishes ECIE from all other on-line error coin clubs.

FROM THE GRADING ROOM: 1964 LINCOLN CENT STRUCK ON A COIN OF INDIA

BY NGC

NGC Graders share an intriguing and visually dramatic error coin that was recently submitted for certification.

FROM THE GRADING ROOM: 1964 LINCOLN CENT STRUCK ON A COIN OF INDIA

Among the various types of error coins that exist, one of the most coveted are coins overstruck on foreign coins from other countries. At a glance, these coins look so unusual or different from typical coins, they immediately invite investigation. Second, they prompt an interesting series of follow-up questions: how did these come to be made; were they made deliberately; and why?

Recently submitted to NGC was one of these very curious double-denomination errors: a 1964 Lincoln Cent struck on a cancelled India 1942 1/4 Rupee. In .500 fine silver, its color immediately signals it is something different. Odd diamond cross-hatching, the results of cancellation, has overlaid a textured pattern to both obverse and reverse. Closer examination identifies the undertype. Clearly discernible running vertically across Lincoln's profile bust are the words, in four lines, "1/4 / RUPEE / INDIA / -

1942 -". This undertype, an India 1/4 Rupee, KM-546 is a two-year design type struck in Calcutta, which was cancelled prior to being overstruck with Lincoln Cent dies.

Fortunately, we do know a little of its provenance. It was submitted to NGC by coin dealer Gregory Field, a partner with New England Rarities, who represents the family of the original owner. He relayed to NGC that the owner removed the coin from circulation himself in 1964. It had been used in purchase at a Brooklyn Heights, NY delicatessen he owned. Being a casual collector, the owner began to look more closely at the change drawer in his restaurant after it was announced silver coinage would soon be removed from circulation. The coin has remained with the family since then, now offering it for sale by Field on the website nerarities.com.

The coin may be known to some in the numismatic community

FROM THE GRADING ROOM: 1964 LINCOLN CENT STRUCK ON A COIN OF INDIA

as it was first sent to a prominent numismatist for authentication in 1976. At least one Cent struck on an uncanceled 1/4 Rupee is also known. It's natural to assume that such coins were made deliberately by a Mint employee or for the favor of an important visitor to the Mint, wanting an oddity to sell for profit or a special keepsake. This may not be the case here.

Adding to the evidence that these coins were made by mistake are two considerations. First, the coin was found in circulation in 1964, suggesting that it promptly entered commerce and wasn't held back as a memento or to be sold. Second, a 1964-D Jefferson Nickel struck on a cancelled India 1940 1/4 Rupee is also known. This means that the same circumstance that occurred at the Philadelphia Mint, where this Lincoln Cent was struck, was repeated at the Denver Mint. That may well rule out the theory that a single Mint employee or someone

with special access to the minting process was involved. For an unknown reason, silver India 1/4 rupees were intermixed with cent planchets at Philadelphia and nickel planchets at Denver!

Similar errors have occurred in the past. The US Mint struck coins for over 40 foreign countries from 1876 into the 1980s. Occasionally these foreign coins got mixed with regular US coinage planchets, creating popular double-denomination error coins. But the US Mint has never produced coins for India, adding to the intrigue of this piece.

The subject coin shows only the lightest evidence of circulation, perhaps amplified in appearance by the color of the undertype which was circulated before cancellation. The melding of the cancelled 1/4 Rupee and Lincoln Cent design has created a charming and visibly appealing error. It is graded AU 58 by NGC.

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

PCGS CoinFacts

Your Online Reference for U.S. Coins

Welcome to PCGS CoinFacts. Our site includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

Unique Double Struck Peace Dollar

by Mike Byers (mikebyers.com)

Unique Double Struck Peace Dollar

Major mint errors in the U.S. Peace Dollar series are very rare. There are only a few known off-centers, broadstrikes and double strikes. Peace Dollar mint errors are many times rarer than Morgan Dollar mint errors.

This is an unbelievable and unique Peace Dollar that was double struck. It is a flip-over since the struck coin flipped over but remained in the collar. It was subsequently struck again and rotated 270 degrees between the strikes.

There are a few double struck Peace Dollars known but the second strikes are 80% to 95% off-center and several have uniface reverses.

This is the only known flip-over double struck Peace Dollar. It was authenticated and certified AU 58 by PCGS. It is unique since it is double struck in the collar and is also a flip-over.

There is considerable detail remaining from the first strike on both sides. Especially on the reverse which shows the entire portrait, eyes, nose, mouth, lips and chin from the first strike which was struck by the obverse die. The obverse also shows detail of the Eagle's wings and the rays of the sun from the first strike which was struck by the reverse die.

This is truly a unique and dramatic major mint error in the Peace Dollar series.

Unique Double Struck Peace Dollar

Unique Double Struck Peace Dollar

Unique Double Struck Peace Dollar

Notice the considerable detail of the portrait and face from the first strike.

Unique Double Struck Peace Dollar

Notice the considerable detail of the Eagle's wings and rays of the sun from the first strike.

ANACS is the Collector's Choice because we know what counts: knowledge, integrity, and service. How much we value coin collecting is evident in our work.

The ANACS team enthusiastically works to advance coin collecting by offering unequaled expertise and developing new services.

This makes ANACS the choice of hobbyists, professional numismatists, and dealers. We are the coin grading service to contact when you want to know all the details about your coin's authenticity and grading.

Mint Error News Price Guide

- Updated August 2016 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated August 2016)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,000 - \$1,500	\$1,000	\$3,000	\$1,500 - \$3,000	\$500

Broadstrikes (Updated August 2016)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Partial Collars (Updated August 2016)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated August 2016)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins (Updated August 2016)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets

Struck Fragments

(Updated August 2016)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000
Lincoln Cent Memorial	\$75	\$125

Mated Pairs (Updated August 2016)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Mint Error News Price Guide

Transitional Errors (Updated August 2016)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

U.S. Gold Errors (Updated August 2016)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$1,000	\$5,000	\$2,000	\$10,000	\$25,000

Indents (Updated August 2016)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated August 2016)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated August 2016)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated August 2016)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated August 2016)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated August 2016)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated August 2016)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

Off-Metals (Updated August 2016)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

Mint Error News Price Guide

Counterbrockages

(Updated August 2016)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Mint Error News Price Guide

Fold-Over Strikes (Updated August 2016)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500
Lincoln Cent Memorial Zinc	\$750	\$1,000	\$1,000	\$1,250

Martha Washington Test Pieces (Updated August 2016)

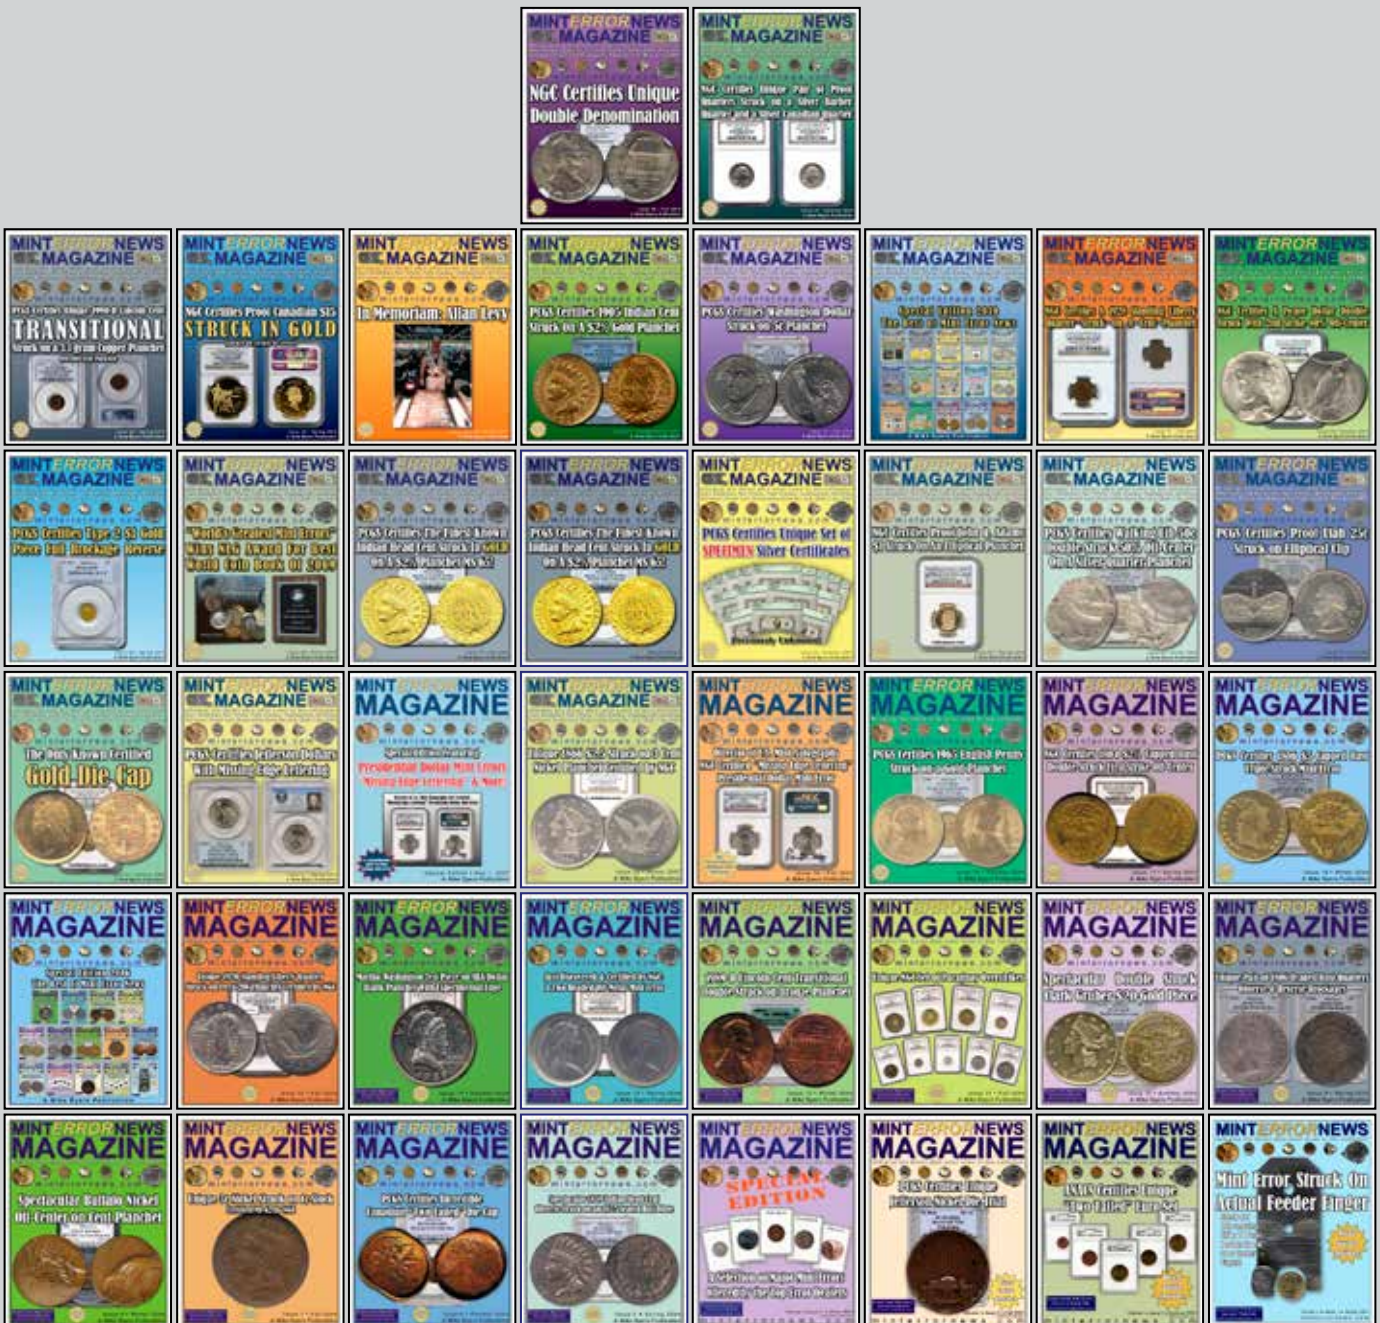

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

MINT ERROR NEWS MAGAZINE

Issues of Mint Error News Magazine are available for you to read online at:
minterrornews.com

Mike Byers is the Publisher & Editor of Mint Error News Magazine

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

MINT *ERROR* NEWS GLOSSARY

What Are Gold Errors?

All major mint errors on U.S. Gold coins are very rare. Very few pieces escaped the quality control at the Mint since all Gold denominations are examined very carefully.

There are only a few known double struck (or multiple struck) U.S. Gold coins. Off-center strikes are also extremely scarce. This spectacular \$20 Liberty Gold Piece is the only off-center known. It was struck 15% off-center and certified MS 63 by PCGS.
