MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our thirteenth year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,000 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over thirty-five years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.com.

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace. He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types. He is one of the original 31 dealers selected as an authorized P.C.G.S. (Professional Coin Grading Service) dealer at its inception in 1986.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions. Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

NGC Certifies Unique GOLD Belgium Franc Obverse Die Trial (1904 Design Overstruck on 1903 Design)

by Mike Byers (mikebyers.com)

This is a unique, spectacular and dramatic
Belgium Franc struck in GOLD.

NGC Certifies Unique GOLD Belgium Franc Obverse Die Trial (1904 Design Overstruck on 1903 Design)

Below is an example of the 1903 obverse (French text) and the 1904 obverse (Dutch text) both struck in silver:

It is an obverse die trial to test the die in 1904, which was the first year of issue. The gold planchet that was selected is larger in diameter than the silver planchet used for the regular issue. It was first struck using the 1903 obverse die that has French text. Patterns with the obverse design with French text were only struck in 1903. It was struck again with the 1904 obverse die that has Dutch text. The separation between the strikes is clearly visible in the portrait, lettering and denticles. The difference in spelling is particularly evident in the word BELGES (French)

on the understrike and BELGEN (Dutch) on the overstrike.

Many renowned numismatists specializing in world gold coins describe the surface as a matte finish. It has the gold color and granular finish typical of gold coins struck in matte proof or matte specimen. This is a *discovery piece* and the *only known* Belgium gold die trial of the 1904 design overstruck on the 1903 design. This is an exciting and unique numismatic rarity appealing to collectors of gold strikings, patterns, die trials and mint errors.

NGC Certifies Unique GOLD Belgium Franc Obverse Die Trial (1904 Design Overstruck on 1903 Design)

NGC Certifies Unique GOLD Belgium Franc Obverse Die Trial (1904 Design Overstruck on 1903 Design)

NGC Certifies Unique GOLD Belgium Franc Obverse Die Trial (1904 Design Overstruck on 1903 Design)

The detail from the understrike is clearly visible in the lettering and denticles.

A Visit With Fred Weinberg

by Mike Byers (mikebyers.com)

It is always a pleasure to visit Fred Weinberg (fredweinberg.com) in his office to conduct business and have lunch. Fred and I have been doing business for decades. My mother used to take me to Fred's office before I was sixteen and able to drive myself. We always have interesting mint errors to show each other and catch up on all the gossip.

A Visit With Fred Weinberg

Here is a coin that Fred showed me which is unique and pretty cool since it is on a large gold U.S. denomination.

NGC CERTIFIES UNIQUE CENT

BY NGC

1982-D Small Date variety previously unknown in bronze.

NGC CERTIFIES UNIQUE CENT

Numismatic Guaranty Corporation® (NGC®) has certified the only known example of a 1982-D Small Date cent struck in bronze. The unique coin was discovered in November by an anonymous collector in Minnesota after he decided to examine a hoard of bronze cents that he had accumulated from circulation.

In 1982 the United States transitioned its cents from bronze to brass-plated zinc and modified the bust, lettering and date. These changes resulted in seven distinct varieties being issued for circulation that year: 1982 Large Date Bronze, 1982 Small Date Bronze, 1982-D Large Date Bronze, 1982 Large Date Brass-Plated Zinc, 1982 Small Date Brass-Plated Zinc, 1982-D Large Date Brass-Plated Zinc and 1982-D Small Date Brass-Plated Zinc.

No 1982-D Small Date Bronze cents were issued or known to exist

until the discovery of the specimen recently certified by NGC. While one could argue that this piece is the eighth variety of circulation issue 1982 cents, NGC has attributed it as a mint error since it was undoubtedly struck in error from a leftover planchet and unintentionally released into circulation. The piece weighs 3.08 grams, which is well within the Mint's tolerance for bronze cents.

The owner of this very special coin contacted variety and error specialist Ken Potter, who revealed the existence of the sole 1982-D Small Date Bronze cent in an article published by Numismatic News. The unique coin was then submitted to NGC for certification. NGC confirmed the bronze composition and the coin's weight—3.08 grams—was well within the Mint's tolerance for bronze cents. The coin was graded NGC AU 58 and attributed as the “discovery coin.”

THE BALTIMORE COIN SHOW & THE COIN MARKET

by Jon Sullivan

We're finally catching up after a busy Baltimore coin show last week. The show, located in Baltimore, Maryland, and held 3 times a year, is one of our favorite shows of the years, due to its excellent location, which brings in lots of both customers and dealers from all over.

This year we were wondering how good the show would be, since the coin market as a whole has been lackluster for the last number of years, and the error market has been effected as well. What all has caused a downturn in the coin market is anyone's guess (and if you ask coin dealers, you will get

different answers) and there are many factors which undoubtedly play a roll. So we were interested to see how this show would be both for us, as well as for the non-error dealers at the show.

Overall, the show was excellent, with most dealers we talked to saying they were having a “good show”, and with other dealers having “their best Baltimore show ever!” There was a good energy at the show, and dealers seemed happy at the amount of selling they were doing. The auctions seemed to do well, with the Pogue sale of high-end coins having lots of excited bidders, and the various errors we saw in auctions went for good prices in our opinion.

Buying and selling were overall good at the show. We bought less than we wanted to, and sold more than we expected, and overall would say that it was an active

and good show, and we think the coin market appears to be on the upswing. Of course you cannot judge an entire market by one coin show, and we aren't. Up till now, we've seen prices for error coins holding steady across most types and series, and with some areas being very active, with prices well above that of recent years.

We are excited to see how the rest of the year goes, but things appear to be having an upward momentum for both the error market, and the coin market as a whole.

In our next blog post, we will dive into some areas of the error coin market where prices are low, and therefore would be an excellent area to start a collection (low prices rarely last, and are often opportune times to build collections.)

Happy collecting!

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit krausebooks.com for more information.

NGC GRADES RARE CANADIAN SILVER MAPLE LEAF ERROR

BY NGC

A unique Canadian Maple Leaf error is certified by NGC.

Interestingly, besides being much lighter than normal, at 25.1g instead of the correct 31.1g, this piece is also much smaller than normal. Its planchet is nearly 2mm smaller in diameter than those used for silver Maple Leaf bullion coins.

This important error was submitted to NGC by Harlan J. Berk, Ltd. Although the coin's owner has only 0.8 ounces of silver instead of the one ounce stated on the coin, they probably are not disappointed. The value of this unique mint error undoubtedly exceeds the bullion value of this coin by many, many multiples.

GRADING AND HONESTY IN NUMISMATICS

by Jon Sullivan

This very short article is on coin grading and honesty among coin dealers and collectors. Two of the biggest problems in the coin market, as laid out in a recent Coin World article by Q. David Bowers, are current grading standards and honesty in the hobby.

Although coin grading does not effect the error market very much, it is still relevant. Without going into much detail, the bottom line in our opinion when it comes to grading (and we cannot overstate these points):

1. Buy the coin for its eye-appeal, and not for the grade on the holder.

2. Do not ignore detractors (ugly toning, surfaces problems, poor strike) just because the coin has a high numeric grade.

3. Do not pay a large premium for 1 or even 2 grade points higher. It's not worth it, and when grading standards are as lax as they are, and when eye-appeal plays so little a role in determining grade, it's especially not worth it.

Grading standards go up and down, and what are currently the grading standards may not be the standards in 10 years time. Paying very high premiums for minute differences in a coin's appearance is a bad idea almost always.

Honesty is another problem. Coins should be sold at a reasonable profit to the seller (be it a collector selling or a dealer), but all coins should

be sold at a price that the dealer/collector would be willing to buy the item back for a reasonable discount, if offered the coin the next day. It's important to add the "next day" because if market conditions change, obviously a dealer or collector should not feel obligated to base their "buy" price on coins sold in a now evaporated market. A coin worth \$1000 3 years ago may only be worth \$200 now because a "hoard" of the coin came out, or because demand (and therefore the retail price) has dropped. Or it may be still worth \$1000, in which case the dealer/collector shouldn't pay \$200 for it, but should be honest and pay a reasonable price.

Honesty does not have a price, and we should all do to others as we would have them do to us. It's the right thing to do, and will also benefit the dealers, the customers, and the hobby as a whole in the long run.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

WHAT ARE “STRUCK-THROUGHS?”

BY NGC

Struck-throughs range from very small to large and determine whether a coin will receive a numerical grade as well as a Mint Error notation.

The most common type of mint error may be a “struck through,” yet these are often misunderstood by collectors. Struck throughs occur when a piece of foreign material comes between the die and a planchet during striking. The coin is said to be “struck through” the foreign material, which leaves behind an impression on the coin’s surface.

Most struck throughs are extremely small, caused when

tiny pieces of dust or other nearly microscopic particles are inadvertently struck into a coin. These minuscule struck throughs are commonly seen on mass produced modern silver bullion coins such as Uncirculated American Silver Eagles and Chinese Silver Pandas. Coins with these nearly imperceptible struck throughs can still get the top grade of 70 but generally cannot receive a Mint Error notation from NGC.

WHAT ARE “STRUCK-THROUGHS?”

This 2016 Mexico Silver ¼ Onza is graded NGC MS 70 and has a tiny strike through (circled in red).

WHAT ARE “STRUCK-THROUGHS?”

This 2014 Vatican City 5 Euros graded NGC PF 70 Ultra Cameo has a few extremely minor strike throughs on the obverse (circled in red).

WHAT ARE “STRUCK-THROUGHS?”

Struck throughs can occasionally be quite large, however, and collectors will often pay a premium for these prominent mint errors. While large struck throughs can be attributed as “Mint Errors” by NGC, they are not eligible for the MS 70 grade.

1982 Singapore 50C with massive obverse strike through.

WHAT ARE “STRUCK-THROUGHS?”

This 1982 Singapore 50C is an example of a very large strike through. It appears that a piece of string came between the obverse die and the planchet. There are even impressions from the small fibers in the string. NGC does not lower points for the struck through mint error and therefore assigned a grade of MS 64 along with a Struck Through Mint Error notation.

There are some struck through mint errors that are so severe,

however, that the coin cannot be numerically graded. For example, a coin struck through grease may have most of its design elements obscured. These pieces will be described as best as possible and labeled “MINT ERROR” on the NGC label.

This 1999 Virginia Statehood Quarter was struck with dies that were covered in grease. This obstruction prevented the dies from imparting much of the detail on the coin. Due to this, the

(1999) Virginia Statehood Quarter Struck Through Grease.

WHAT ARE “STRUCK-THROUGHS?”

coin will not receive a numerical grade, but it will still receive the MINT ERROR designation and be encapsulated with a standard NGC label (not an NGC Details label).

As you can see from the examples above, struck through errors

come in a variety of types and sizes. Usually, these errors are small and don't command much of a premium. However, when they are large or more obvious, they can often greatly enhance the desirability and value of a coin.

Error Coin Information Exchange

The Error Coin Information Exchange (ECIE) is a freewheeling forum dedicated to the study of error coins and varieties. Founded and hosted by veteran writer and researcher Mike Diamond, it is a great place to visit, whether you're an established collector or a novice. ECIE is not flashy and doesn't waste your time with a message board clogged with idle chit-chat. It simply provides the best information on error coins available on the web. Here you can read about late-breaking developments; find out about the newest discoveries; listen or participate in spirited debates about how error coins are produced; test your skills with periodic quizzes and brain-teasers. ECIE proudly maintains an atmosphere of skeptical inquiry. Here, no claim goes unchallenged and no theory goes untested. This is the best place to find out what kind of error you really have, how it was created, and the extent to which it is rare or unusual.

Policy Statement: By design, ECIE does not attempt to develop partnerships with dealers, grading services, or auction houses. It neither seeks, nor encourages, discounts, promotions, giveaways, or advertisements. To do otherwise would create a conflict of interest that could compromise the fierce independence and impartiality that distinguishes ECIE from all other on-line error coin clubs.

MIKE BYERS INC

MIKEBYERS.COM

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

MINT ERRORS: SALES PRICES FOR THE TOP 100

This is a list of the top 100 United States Mint Errors that have recently sold. These have been certified, authenticated and graded by PCGS, NGC and ANACS. Sales are reported by Mike Byers, Mint Error News, Andy Lustig and Fred Weinberg. Auction records are reported by Heritage, Stacks Bowers, Goldberg and Superior. Private Treaty Sales reported by Legend Numismatics and Mike Byers. The sales prices range from \$1.7 Million to \$32,000. Obviously a few private sales have not been listed due to confidentiality. To date, this is the most comprehensive list of the prices realized for the top 100 United States Mint Errors.

PCGS CoinFacts

Your Online Reference for U.S. Coins

Welcome to PCGS CoinFacts. Our site includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

ANACS is the Collector's Choice because we know what counts: knowledge, integrity, and service. How much we value coin collecting is evident in our work.

The ANACS team enthusiastically works to advance coin collecting by offering unequaled expertise and developing new services.

This makes ANACS the choice of hobbyists, professional numismatists, and dealers. We are the coin grading service to contact when you want to know all the details about your coin's authenticity and grading.

Mint Error News Price Guide

- Updated April 2017 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated April 2017)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,000 - \$1,500	\$1,000	\$3,000	\$1,500 - \$3,000	\$500

Mint Error News Price Guide

Broadstrikes (Updated April 2017)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Mint Error News Price Guide

Partial Collars (Updated April 2017)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated April 2017)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins

(Updated April 2017)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets
Lincoln Cent Wheat Ears	\$5,000	\$15,000	–

Struck Fragments

(Updated April 2017)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000

Mated Pairs (Updated April 2017)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps

Transitional Errors (Updated April 2017)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

U.S. Gold Errors (Updated April 2017)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center

Indents (Updated April 2017)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated April 2017)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated April 2017)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated April 2017)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated April 2017)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated April 2017)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated April 2017)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

Off-Metals (Updated April 2017)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Counterbrockages

(Updated April 2017)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Fold-Over Strikes (Updated April 2017)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Martha Washington Test Pieces (Updated April 2017)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

MINT *ERROR* NEWS GLOSSARY

What Are Overstrikes?

Overstrikes are coins that have been struck over a struck coin. Generally speaking, there are two major types of overstrikes. The first type would be a double denomination (a Lincoln Cent struck over a struck Dime). Although these are overstrikes, they are referred to as double denominations and are known on many denominations of coins from many countries.

The other main type of overstrike is a coin which is struck (either deliberately or as a mint error) on a previously struck coin from a different era and country. In ancient times, it was not uncommon to strike coins over previously struck coins with portraits of earlier Kings. In Colonial times, coins circulating were sometimes struck using other coins that were in circulation, regardless of whether they were from the country striking the coin or from a different country.

A rare example of an overstrike is a 1915 Panama Half Commem which was struck in Proof over a cut down St. Gaudens \$20 gold piece. The example shown above is an example of a rare overstrike from Mexico. It is a gold 8 Escudos struck over an earlier type and is listed in Krause as rare. The Panama Half and 8 Escudos were intentional overstrikes. There are also examples of unintentional overstrikes which are classified as mint errors.

2017 Coin Shows
