MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our thirteenth year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,000 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over thirty-five years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.com.

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace. He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types. He is one of the original 31 dealers selected as an authorized P.C.G.S. (Professional Coin Grading Service) dealer at its inception in 1986.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions. Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

NGC Certifies Mexico 60 Pesos Struck on U.S. \$10 Liberty

by Mike Byers

This incredible Mexico 1916 Oaxaca Gold 60 Pesos was struck on a U.S. \$10 Liberty.

NGC Certifies Mexico 60 Pesos Struck on U.S. \$10 Liberty

The 1916 Gold 60 Pesos were struck in Oaxaca, Mexico. Oaxaca is one of the southern states in Mexico. The coins bear the portrait of Benito Juarez. These coins were struck by a

Provisional Government during the revolution. The original dies for the 1916 60 Pesos were impounded at the ANS almost a century ago.

The specifications for the 1916 Oaxaca Gold 60 Pesos are:

- **Composition: Gold**
- **Fineness: 0.8590**
- **Weight: 50.0000g**
- **AGW: 1.3808735351327oz**

The specifications for the U.S. \$10 Liberty are:

- **Composition: Gold**
- **Fineness: 0.9000**
- **Weight: 16.7200g**
- **AGW: 0.4837oz**

Here is a comparison with a regular Gold 60 Pesos and \$10 Liberty:

NGC Certifies Mexico 60 Pesos Struck on U.S. \$10 Liberty

The Smithsonian recently preserved a collection through NGC encapsulation that included a Mexico 1916 Oaxaca Gold 60 Pesos. They describe it “is one of a handful of survivors from an original mintage of 21 pieces.”

Krause lists the 1916 60 Pesos as rare with a value of \$20,000 in XF 40 and \$35,000 in MS 60. A specimen sold in an ANR Auction (Eliasberg) for \$74,750 which subsequently was certified by NGC as MS 64. Heritage Auctions recently sold a PCGS MS 64+ for \$102,000.

This spectacular gold piece is in almost uncirculated condition with original and attractive toning. There is a considerable amount of detail remaining from the understrike. On the obverse the denticles and some detail are visible from the \$10 Liberty design. On the reverse the shield and some detail are visible as well. The complete reeding from the \$10 Liberty is intact.

This fascinating and dramatic numismatic rarity would be the centerpiece of a major world gold coin collection or a collection of U.S. \$10 gold coins.

BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.

NGC CERTIFIES RARE 1942 AND 1943 WRONG-PLANCHET CENTS

BY NGC

Two previously unknown 1943 “copper” cents and two other wrong-planchet errors were recently certified by NGC.

Numismatic Guaranty Corporation® (NGC®) has certified an extraordinary group of four 1942 and 1943 Lincoln Cents struck on the wrong planchets. Included in this group are two examples of the 1943 bronze (“copper”) cent, one of the most famous US error coins.

In 1943, the US Mint used zinc-coated steel for Lincoln Cents instead of the usual bronze (or “copper”) composition in an effort to preserve copper for the war effort. A small number of bronze planchets were nonetheless struck with these 1943-dated dies and escaped the Mint.

The 1943 bronze cents quickly piqued the interest of collectors, who were excited that something seemingly so mundane—a

“copper” cent—could be so rare and valuable. Reports of finds in circulation added to the enthusiasm and high prices were soon reported.

This popularity has continued to the present day. In the 100 Greatest Mint Errors book, co-authored by NGC grading finalizer and error coin specialist David J. Camire, the Philadelphia 1943 bronze cent was ranked #4. It has been estimated that only 10-12 Philadelphia 1943 bronze cents exist, a figure that does not include the two specimens recently certified by NGC.

These two new discoveries were graded NGC MS 62 BN and NGC MS 61 BN. The former specimen, at MS 62 BN, ranks as the second-finest 1943 bronze cent certified by NGC. The latter is particularly interesting,

however, because it is the only example known with a large die break on the obverse.

“1943 Lincoln cents struck on bronze planchets are one of the ‘Holy Grails’ of US numismatics,” says Camire. “It is very exciting to see two examples in a single submission, especially the unique example featuring the die break on the obverse.”

The submission of the two 1943 bronze cents also included two Lincoln cents struck on planchets intended to be used for foreign coins that were then being struck by the Philadelphia Mint. There was a 1942 cent struck on an Ecuador 20 Centavos planchet, which NGC graded MS 63, and a 1943 cent on a Netherlands 25 cent planchet that was graded NGC MS 61.

“It is extremely unusual to see wrong planchet error cents from this time period,” adds Camire. “Recent appearances of such errors are few and far between.”

This incredible group of coins was submitted to NGC by the family of former US Mint employee Albert Michael Pratt. The coins were brought to the West Hernando Coin Club coin show in January 2017 where they were shown to John A. Zieman Jr. of Z-man’s Coins, who submitted them to NGC on behalf of the family. “NGC has a great reputation for being very consistent, has awesome customer service and very fast turnaround times. It was a no brainer that I submitted these coins to NGC,” says John Zieman. For more information about Z-man’s Coins, visit zmanscoins.com.

ERROR COIN COLLECTING OPPORTUNITIES FOR 2017

by Jon Sullivan

The year is off to a good start in our opinion, with our sales being brisk, major auction results looking relatively strong, and overall good activity in the market. We have been through a number of major coin shows, auctions, and have been able to get a feel for how the error coin market is doing.

There are strong areas and weak areas, with some of the more common (even if expensive) errors types being generally weak, and

but with the truly rare, dramatic, or unusual error types being in demand. We are out of stock of many error types, and coins we have often had multiples of, and currently we cannot find replacements. This shows the strength of the market to us. Although we cannot know what the rest of the year will bring, we are optimistic and please with how the year is going so far, and are looking forward to the rest of the year.

So what are some areas which

are good collecting opportunities right now? Certain types of errors have dropped in price in the last number of years, and prices are at the lowest they've been in years for some of these error types. This is an opportunity for collectors to start building a collection. Although error coin collecting is not really an investment, the investing mantra "buy low, sell high", bears some relevance to collecting. So here are some areas which we believe are good values right now (these are not listed in order of "good value.")

1. Lincoln cent on Roosevelt dime double-denominations Average Cost: \$750

These have come down in price over the last several years, with "common date" 11c coins selling for around \$500-\$650 in average mint state grades. Even some of the scarcer dates sale in this price range or a little more due to a lack of demand. A collection by date would make a very challenging and difficult set—

but the difficulty is half the fun, which would make it a good set.

Because there is little competition for the rare dates/mints at this time, this would make a great set to work on right now.

2. State Quarter Errors Average Cost: Varies

The market for state quarter errors priced under about \$1,000 is soft right now, making for a good collecting opportunity.

There are any number of error types to collecting within the state quarter series: missing clad layers, double-strikes, off-centers, elliptical clips, etc. Pick an error type and then start collecting it. There is a lot of fun in trying to accomplish a set like this, and quite a challenge as well. 50 coins would be required to complete a set for any of these error types, with some states being super rare, and some being relatively common. Prices on these generally are 25-50% lower than they were 10 years ago, and that's a good thing for collecting them.

3. Modern Off-Centers by Date/ Mintmark

Average Cost \$5-\$75

Pick a series from Lincoln cents to Kennedy half dollars, and all are soft right now, with prices down. Although there are serious collectors forming sets, there aren't as many right now, making for a good opportunity.

A good idea would be to pick a series, for example Lincoln Memorial cents, and then build a set by date and mintmark, with a requirement that all coins being 40-60% off-center, and mintstate, and with no major problems (counting wheel marks, etc, are so common on off-centers, it's ok to have one, but nothing really obvious or major.) A set like this will cost much less than it did 10 years ago.

4. Off-Metal Jefferson Nickels on Cent Planchets

Average Cost: \$350 a coin

Prices are pretty soft right now, with the exception of the earlier date coins (which are so rare that they are always in high demand.) Doing a set by date or date and mintmark would be very challenging, so a date set might be a better option. Also, the error type itself makes a nice collection because the error is very obvious since the off-metal is a big

contrast (copper vs normal nickel.)

A good idea might be to limit the set to start in 1955, since many of the dates and mints prior to that year are rare and hard to find (although doing such a set would be neat and a great challenge for the collector who is up to it.) The coins in the 1990's will be very tough as well, although because most collectors don't realize just how rare they are, you could likely pick them up (if you were lucky enough to find one) at a relatively low price.

5. Buffalo Nickel Off-Centers Average Cost: \$750

Although always popular, at the moment buffalo nickel off-centers are fairly cheap. There have been enough of them come on the market in the last 5-10 years, that prices are lower than they used to be for most off-centers (very nice or very rare date examples being the exception.)

Collecting a date or date and mint mark set would be very challenging and fun, although more expensive than other coin series. Being a beautiful and popular design makes them a somewhat more expensive, but also a more attractive set.

6. Lincoln Cent Die Caps Average Cost \$350

These have dropped about 25-50% in the last 10 years, with coins being very affordable right now. 10 years

ago they were selling for about \$500, but have dropped in recent years. a Dramatic error and we like them.

7. Missing Clad Layers on 10c, 25c, Pres/Sac \$1 and SBA \$1
Average Cost: 10c \$35, 25c \$40, \$1 \$200-\$400

While these used to be about 50%

more expensive than they are now, over the last few years they've dropped in price. Generally, these are a good area to be collecting right now, since prices are down.

There are other areas which are good values, but these are a handful of areas worthy of consideration for collecting right now. If what you are buying right now is "hot", with prices going up, maybe it's a good time to stop collecting so much in that area, and pick one of these or some other area in the error coin market which is experiencing weakness. Most price drops in the coin hobby do not last, with fresh collectors eventually coming back in and pushing prices back up. Of course there's no guarantee of that, but as they say "buy low and sell high", and these are some "low" areas at the present time.

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit krausebooks.com for more information.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

Error Coin Information Exchange

The Error Coin Information Exchange (ECIE) is a freewheeling forum dedicated to the study of error coins and varieties. Founded and hosted by veteran writer and researcher Mike Diamond, it is a great place to visit, whether you're an established collector or a novice. ECIE is not flashy and doesn't waste your time with a message board clogged with idle chit-chat. It simply provides the best information on error coins available on the web. Here you can read about late-breaking developments; find out about the newest discoveries; listen or participate in spirited debates about how error coins are produced; test your skills with periodic quizzes and brain-teasers. ECIE proudly maintains an atmosphere of skeptical inquiry. Here, no claim goes unchallenged and no theory goes untested. This is the best place to find out what kind of error you really have, how it was created, and the extent to which it is rare or unusual.

Policy Statement: By design, ECIE does not attempt to develop partnerships with dealers, grading services, or auction houses. It neither seeks, nor encourages, discounts, promotions, giveaways, or advertisements. To do otherwise would create a conflict of interest that could compromise the fierce independence and impartiality that distinguishes ECIE from all other on-line error coin clubs.

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

PCGS CoinFacts

Your Online Reference for U.S. Coins

Welcome to PCGS CoinFacts. Our site includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

ANACS is the Collector's Choice because we know what counts: knowledge, integrity, and service. How much we value coin collecting is evident in our work.

The ANACS team enthusiastically works to advance coin collecting by offering unequaled expertise and developing new services.

This makes ANACS the choice of hobbyists, professional numismatists, and dealers. We are the coin grading service to contact when you want to know all the details about your coin's authenticity and grading.

Mint Error News Price Guide

- Updated August 2017 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated August 2017)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,000 - \$1,500	\$1,000	\$3,000	\$1,500 - \$3,000	\$500
Proof Jefferson Nickel	\$2,500 - \$4,000	\$4,000	\$4,000	\$2,000 - \$5,000	\$1,000
Proof Clad Dime	\$3,000 - \$5,000	\$4,000	\$4,000	\$2,500 - \$5,000	\$1,250

Broadstrikes (Updated August 2017)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Mint Error News Price Guide

Partial Collars (Updated August 2017)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated August 2017)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Denomination	Uniface Obverse XF	Uniface Obverse Unc	Uniface Reverse XF	Uniface Reverse Unc

Bonded Coins (Updated August 2017)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets

Struck Fragments (Updated August 2017)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000

Mated Pairs (Updated August 2017)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Mint Error News Price Guide

Transitional Errors (Updated August 2017)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

U.S. Gold Errors (Updated August 2017)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$1,000	\$5,000	\$2,000	\$10,000	\$25,000

Indents (Updated August 2017)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated August 2017)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated August 2017)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated August 2017)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Denomination	Struck On	Circulated	AU	Unc

Brockages (Updated August 2017)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated August 2017)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated August 2017)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

Off-Metals (Updated August 2017)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Mint Error News Price Guide

Counterbrockages

(Updated August 2017)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Mint Error News Price Guide

Fold-Over Strikes (Updated August 2017)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated

Martha Washington Test Pieces (Updated August 2017)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

minterrornews.com

Mike Byers is the Publisher & Editor of Mint Error News Magazine

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

MINT *ERROR* NEWS GLOSSARY

What Are Overstrikes?

Overstrikes are coins that have been struck over a struck coin. Generally speaking, there are two major types of overstrikes. The first type would be a double denomination (a Lincoln Cent struck over a struck Dime). Although these are overstrikes, they are referred to as double denominations and are known on many denominations of coins from many countries.

The other main type of overstrike is a coin which is struck (either deliberately or as a mint error) on a previously struck coin from a different era and country. In ancient times, it was not uncommon to strike coins over previously struck coins with portraits of earlier Kings. In Colonial times, coins circulating were sometimes struck using other coins that were in circulation, regardless of whether they were from the country striking the coin or from a different country.

A rare example of an overstrike is a 1915 Panama Half Commem which was struck in Proof over a cut down St. Gaudens \$20 gold piece. The example shown above is an example of a rare overstrike from Mexico. It is a gold 8 Escudos struck over an earlier type and is listed in Krause as rare. The Panama Half and 8 Escudos were intentional overstrikes. There are also examples of unintentional overstrikes which are classified as mint errors.
