MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our 15th year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,200 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Over the last 20 years with the advent of the internet millions of collectors have flocked to online auctions and dealer websites. Many people connect to various online forums and clubs to share knowledge and learn about Mint Errors. Everyone, including dealers, collectors and even investors have instant access to information as never before. The Mint Error market has experienced an explosion in collector interest over the last 20 years.

Time and again, rare and unique Mint Errors in the numismatic market have made headline news. Authentication and certification of Mint Errors is now commonplace. In 1991, ANACS was the first to authenticate, grade and encapsulate major Mint Errors. In 1999, PCGS and NGC began certifying Mint Errors. Major Mint Errors are now pursued, collected and traded just like patterns, territorial Gold, colonials and other interesting segments of numismatics.

In 1975, I purchased a 1900 Indian Head Cent struck on a \$2 1/2 Indian Gold blank planchet for \$7,750 at a major coin auction. That price ranked among the top five ever realized for a Mint Error that few dealers or serious collectors would even consider. At that time price guides for Mint Errors were nonexistent and today that Indian Head Cent struck in Gold is certified MS65 by PCGS and is valued at six figures.

MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over thirty-five years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace. He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types. He is one of the original 31 dealers selected as an authorized P.C.G.S. (Professional Coin Grading Service) dealer at its inception in 1986.

MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions. Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

Jeff Ylitalo has collected Mint Error coins since 1993. He has avidly researched & written about this area of numismatics since 2006 contributing dozens of articles to CONECAs bi-monthly publication "ErrorScope" and Mike Byers "Mint Error News". Jeff is the former editor for the "ErrorScope" 2008-2017. Jeff's research and collecting focus is now primarily centered on World Error coins. Jeff can be reached via e-mail at: jylitalo@yahoo.com

UNIQUE GREAT BRITAIN GOLD LAUER VICTORIA PATTERN OBVERSE DIE TRIAL

by Mike Byers

UNIQUE GREAT BRITAIN GOLD LAUER VICTORIA PATTERN OBERSE DIE TRIAL

Several patterns struck in gold with new designs were submitted in 1887 for the jubilee of Queen Victoria. Her young head portrait had been used for 50 years since her coronation in 1837. This unique gold pattern portrays a new portrait of Queen Victoria on the obverse. It is technically an obverse die trial and is uniface since there is no design or denomination on the reverse. This unique Great Britain gold pattern was designed by L. C. Lauer, who was a famous German engraver who designed well known gold patterns in 1887 for the Queen's Jubilee. Lauer had Adolph Weyl present it in 1887 to the Royal Mint as a proposed pattern for the design change. This Proof 63 Lauer gold pattern obverse die trial is unique since it is only of Queen Victoria's portrait.

There is some speculation that this gold pattern was intended for a Florin, Half Crown or Penny, each with a diameter of 29.5mm or more. Many

experts believe that this pattern was intended for a gold 2 Pound design since the diameter specification is 28.4mm which is the closest size to this pattern of 27.2mm. This piece is considered unique from 1887 due to the design and is almost identical to other patterns Lauer struck for the 1887 portrait change. It was intended for one of four denominations but is closest in diameter to the gold 2 Pound.

In the reference book used by PCGS and NGC, English Pattern Trial and Proof Coins in Gold by Alex Wilson and Mark Rasmussen, Lauer's gold patterns for 1887 are photographed, attributed and assigned W&R numbers. This includes W&R #378 on page 433, which is an undated obverse pattern (1887) for an unspecified denomination, also by Lauer, with a very similar portrait of Queen Victoria. Also listed and plated in W&R is #371 on page 426, a gold Crown pattern of 1887 that was designed by Lauer for the

UNIQUE GREAT BRITAIN GOLD LAUER VICTORIA PATTERN OBVERSE DIE TRIAL

jubilee of Queen Victoria. There are six known and one just sold in a Heritage Auction for \$156,000. W&R lists several other gold patterns designed and struck by Lauer for the reverse design and some with both the obverse and reverse design including (3) 6 Pence patterns, (3) Penny patterns, (2) 1/2 Penny patterns and (2) Farthing patterns. W&R #394 on page 450 documents a uniface obverse pattern for an 1887 Penny, also by Lauer and is 31mm. There are other Lauer gold patterns for the 31mm Penny that are uniface as well (BMC-2137, BMC-2172).

Lauer is famous for designing and producing well known gold patterns for Queen Victoria's Jubilee for Spink & Son in 1887. The highest price recorded for a Lauer Great Britain gold pattern in auction for an 1887 design is a gold Crown (ESC-342A), also pedigreed to the Murdoch Collection of 1904. It realized \$235,000 and is considered one of only two known. Also sold in auction was a small 1887 gold 6

Pence pattern Rarity 5 (6-10 known) that was designed by Lauer (W&R #381) which realized over \$17,000. Also sold in a Heritage auction was an 1887 Victoria pattern gold Penny, also by Lauer, W&R #392 for \$20,562 with 3-5 known.

Since this design is almost identical to the 1887 gold Crown designed by Lauer for Spink & Son, which realized \$156,000 in the Heritage auction, it is believed that this veiled head portrait of Queen Victoria was also commissioned by Spink & Son in 1887. There are no surviving records or documents since there was a fire during World War II that destroyed the Spink & Son records in London.

Although the diameter of this unique gold pattern is closest to the gold 2 Pound, Lauer did not conform to the British weight standards when producing the planchets to strike his gold and silver patterns. W&R #378 is a pattern in gold by Lauer but weighs 7.64 grams, not the standard

UNIQUE GREAT BRITAIN GOLD LAUER VICTORIA PATTERN OBVERSE DIE TRIAL

7.32 grams for a Sovereign. Several of his silver Crown patterns for Queen Victoria listed in ESC did not conform to the sterling silver ratio as well. So it is documented that the diameter, weight and purity differ from pattern to pattern.

This piece was rediscovered in 2008 after the publication of the W&R volume of British gold patterns and proofs, which was published in 2000. It recently appeared and was sold in a Japanese auction of world-class British gold coins, gold patterns and silver patterns. This auction featured several unique British Lauer patterns designed and struck for the 1887 Victoria Jubilee. Also featured were 5 Pound 1839 Una and the Lion off-metal patterns and British silver Crown patterns and die trials by Lauer for Queen Victoria. These were from the Murdoch Collection and not listed in W&R or ESC.

This gold pattern by Lauer, pedigreed to the Murdoch collection in 1904, is

not listed in any reference book and was auctioned by Sotheby's in 1904, lot #541. This lot also included an 1887 pattern Farthing in gold. There were seven sessions of the sale of Murdoch's collection, featuring unique gold and silver British patterns and die trials which even one hundred years later is regarded as one of the most famous British coin collections ever assembled and sold.

NGC authenticated and certified this gold pattern as Medal PR 63 Cameo, since the exact denomination is unknown. The insert documents that it is designed by Lauer and is from the world famous Murdoch Collection of 1904. This unique gold pattern belongs in a world-class collection of British gold coins, or pattern and die trials or in a collection of unique numismatic rarities. This coin stands alone as a unique part of the history of Great Britain's coinage during the reign of Queen Victoria from 1837 to 1901.

UNIQUE GREAT BRITAIN GOLD LAUER VICTORIA PATTERN OBVERSE DIE TRIAL

Hub Trials and Die Trials are featured in chapter 13 of my NLG Award winning book, World's Greatest Mint Errors:

Chapter 13
Hub and
Die Trials

Hub and die trials are usually uniface (or struck on one side) impressions using either an obverse or reverse hub/die. These trials can be from either finished or unfinished designs. In either case, they are deliberate strikes to test the progress of a design and/or its suitability for regular-issue production.

Hub and die trials are often struck in metals other than those intended for regular-issue coinage. Softer metals such as tin and lead have often been used in the creation of hub and die trials, and there are some pieces known that were struck in cardboard or wax.

Traditionally, only pattern specialists pursued hub and die trials. Beginning in the late 1990s, however, I have seen increased demand for these pieces among error coin specialists who feel that these pieces would fit nicely into their collections due to their exotic appearance and the unusual circumstances under which they were produced.

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

PITTSBURGH ANA 2019

by Jon Sullivan

We recently attended the ANA in Pittsburgh, Pennsylvania, which was from March 27th-30th. The spring ANA as it is often referred, is one of the historically slow “big shows” of the year. Dealer attendance tends to be on the light side, and perhaps corresponding to that, so does the public attendance. However, I’ve always enjoyed the

Spring ANA show since it does give you more time to spend with dealers and customers alike. There’s not the crazy rush of the Summer ANA or Winter FUN show, but is much more laid back, which can lead to interesting conversations and more time to really dig through other dealer’s inventories to find good coins for our customers.

This year, the ANA was pretty much all of what was just described. It was overall a slow show, with not a lot of activity, but we still managed to find a decent amount of quality inventory (most of which has already been listed on our website, seeing as this blog post is a few weeks late.) Some of it is still off at the grading services getting graded. There really was not a lot of error coins for sale at the show, and what few coins were in the auction went for super high money for the most part.

Any of the various auctions haven't been offering much in the way of error coins in the last 6 months or so, and what few coins have been offered, tend to sale for retail+ money. Perhaps it's the minimal number of lots that resulted in fiercer competition among bidders? But that pretty much pushes a coin dealer out, since if a coin isn't being offered at a wholesale price, there's no reason to buy it since you cannot retail a coin

that you paid retail money for!

There were a few impressive error coins on exhibit at the show, including a red 1943 copper cent, and a nice AU 1944 steel cent (we have one of those in our inventory!) Also were the frequent guests of coin show exhibits, including an 1804 draped bust dollar, and a 1913 liberty nickel. Some other interesting exhibits were on display as well. Coin shows give local collectors the rare opportunity to see these historic and popular coins, so it's nice to see the ANA putting these coins on exhibit for collectors to see and appreciate (so often, coins simply sit in dusty drawers in museums, and really do not get shown to the public very often.)

After several days of buying and selling, we got back to our office on Monday, and sold a number of the coins we'd purchased fairly quickly.

NGC CERTIFIES RARE 1943 COPPER CENT

BY NGC

*Fewer than two dozen Philadelphia Mint examples
of these famous mint errors are known to exist.*

NGC CERTIFIES RARE 1943 COPPER CENT

The 1943 Copper Cent recently certified by NGC was found in a gumball machine in Philadelphia in 1976. It was then sold to a collector for the then-significant sum of \$1,000.

The buyer passed down the coin to his children, who decided to submit it to NGC for certification after seeing that another NGC-certified 1943 Copper Cent — the Don Lutes, Jr. Discovery Specimen — had sold for \$204,000 at auction in January. That specimen is named for the teenager who discovered the first 1943 Copper Cent in 1947 in his change.

The family checked the NGC Dealer Locator on NGCcoin.com to find an NGC Authorized Dealer who could

assist with the submission. They found Hudson Rare Coins, which submitted the family heirloom to NGC on their behalf. NGC graded it XF Details.

“When someone calls to say that they have a 1943 Copper Cent, you never expect it to be real. It was therefore an incredible thrill when NGC confirmed this coin as a genuine example,” says Mitchell A. Battino, president of Hudson Rare Coins. “Now that it is certified by NGC there will never be any doubts about the authenticity of this great rarity.”

Hudson Rare Coins will represent the family in the sale of this recently NGC-certified example of the “king of mint errors.”

ANOTHER “OFF-METAL” WORLD COIN STRUCK ON A DIFFERENT COUNTRY’S PLANCHET

by Jeff Ylitalo

This type of major error is exceedingly rare, but in this case I consider it to be unique.

It is a 2010 Bolivian 2 Bolivianos struck on an isolated Chilean 100 Pesos ring intended for a bi-metallic coin.

Here, the aluminum-bronze 100 pesos ring found its way into the coining chamber striking 2 Bolivianos. A normal 2 Bolivianos is a large diameter coin, 29 mm, and struck on a magnetic stainless steel planchet. Therefore the striking chamber

ANOTHER “OFF-METAL” WORLD COIN STRUCK ON A DIFFERENT COUNTRY’S PLANCHET

would accommodate any planchet equal to or less in size. A normal 100 Pesos is 23.5 mm in diameter. Compared to other Chilean die struck isolated 100 Pesos rings I have the weight is correct at 3.3 grams.

This error was also multi struck and off center. The center of the ring has an elongated shape and this coins dramatic visual

appearance is similar to that of a bottle cap opener.

My research indicates the Santiago Mint in Chile strikes coinage for a host of countries including Bolivia.

This is the only isolated ring (never joined with a core) struck by dies from a different country I have ever encountered!

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit krausebooks.com for more information.

A UNIQUE GREAT BRITAIN GUINEA/SOVEREIGN PATTERN

by Mike Byers

Recently Surfaced After 200 Years!

A UNIQUE GREAT BRITAIN GUINEA/SOVEREIGN PATTERN

Although this unique pattern Guinea/Sovereign is listed in the Wilson and Rasmussen reference book as W&R-182 Copper, it is not photographed in this reference book because the researchers and authors could not verify the existence of this coin at the time of publication. In addition, there are no known gold strikings of this pattern Guinea/Sovereign.

Wilson and Rasmussen note that this design is believed to be a 'Petition' on the engraver's part in an effort to obtain the post of Chief Engraver at the Royal Mint. Mills was never employed at the Royal Mint and failed to realize his full potential, because of his untimely death. Nevertheless he engraved for James Mudie a

silver pattern crown of George III and a pattern crown of George IV in collaboration with Whiteaves. Although he died at the age of 32, some of Mills' creations can be seen in the British Museum.

A.H. Baldwin & Sons Ltd. auctioned off part of a collection of gold sovereigns in the Bentley Collection which included rare and unique Guinea and Sovereign patterns. This unique Guinea/Sovereign pattern was not even in that collection. The Royal Mint experimented in transitioning from the Guinea in 1816 to the Sovereign in 1817. There are a few rare issues of pattern and proof coins that were prototypes in 1816 during this change.

A UNIQUE GREAT BRITAIN GUINEA/SOVEREIGN PATTERN

This intriguing and unique piece is of great historical significance and was just recently discovered. It was authenticated and certified MS62BN by NGC. The new standard Sovereign Weight was defined by an act of Parliament in 1816 and production began in 1817. The Guinea was superseded by the Sovereign. The new Sovereigns had King George III on the obverse and St. George Slaying the Dragon on the reverse. This was in place of the Armorial Bearings which had been the chief feature of English reverse types since the Tutor period. The weight of the Sovereign was based on that

of the Guinea which had been coined at the rate of 44.5 to the troy pound, or approximately 125 grains per piece. The weight of the Sovereign was fixed at 123 grains.

Wilson and Rasmussen gave this coin a rarity rating of 7, which is designated as 1-2 known. This is one of only three coins that were listed but designated as “unverified” in the W&R reference book, published in 2000. Since it was just recently discovered and certified, it is a unique pattern and a significant part of The Royal Mint’s coinage history.

WASHINGTON QUARTER STRUCK 70% OFF CENTER ON A CLAD LAYER WITH A UNIFACE REVERSE

by Christopher Talbot Frank, CTF Error Coins

I bought this coin thinking that it was an off center statehood quarter that split after striking error. The PCGS label was incomplete as in a mechanical label error.

I took detailed photos of the coin, and noticed differences in the un-struck areas of the planchet as you would expect to see on a split planchet but, something was off. I studied many

examples of other split planchets and concluded that the split happened before striking as the striations of the split metal were on the obverse side and not the expected reverse side. The design in the uniface area happened because of the thinness of the clad layer. The design from the obverse die transferred thru the thin

layer as it was struck off center with a second blank planchet underneath creating the uniface ghosting look.

PCGS took the coin back for re-holding and gave it a detailed label for this uniquely rare multiple error coin.

Here is the PCGS holder with the original incomplete label:

WASHINGTON QUARTER STRUCK 70% OFF CENTER ON A CLAD LAYER WITH A UNIFACE REVERSE

ANACS is the Collector's Choice because we know what counts: knowledge, integrity, and service. How much we value coin collecting is evident in our work.

The ANACS team enthusiastically works to advance coin collecting by offering unequaled expertise and developing new services.

This makes ANACS the choice of hobbyists, professional numismatists, and dealers. We are the coin grading service to contact when you want to know all the details about your coin's authenticity and grading.

2007-D SMS DIME OBVERSE DIE CAP

by Christopher Talbot Frank, CTF Error Coins

In 2007 a batch of rare major error coins came out of the Denver mint. There were a few dime die caps in the group. This one stood out to me as a super rare, very low mintage, satin finish that was struck by dies specially made for the Special Mint Sets (SMS). The photos clearly show that the coin has a satin finish. The

mintage for the SMS 2007 D Dime is 895,630 versus 1,042,000,00 for the 2007 D regular finish dimes struck for circulation.

The obverse die cap has expanded quite large and also split making it look kind of like Pac-Man.

PCGS CoinFacts

Your Online Reference for U.S. Coins

Welcome to PCGS CoinFacts. Our site includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

A UNIQUE GREAT BRITAIN MULE

by Atlas Numismatics

This Great Britain mule is exceedingly rare. It is a proof-only date and even rarer as a mule with the threepence obverse.

GREAT BRITAIN. *Victoria.* 1862 AR Fourpence Muled with Threepence Obverse. PCGS PR65. Edge: Plain. VICTORIA D:G: BRITANNIA R: REGINA F:D:. Head left / Britannia seated right. KM 731.1 Variant; ESC-3357 (1955B).

UNIQUE GREAT BRITAIN MULE

CERT VERIFICATION #84644231

According to the PCGS Certification Database, the requested certification number is defined as the following:

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

NGC NOW CERTIFIES AND ENCAPSULATES CANCELLED DIES

BY NGC

*Here's how to submit these impressive
numismatic collectibles to NGC.*

1996 Olympics – Tennis Silver Dollar Die – X-Cancelled, certified and encapsulated by NGC.

Numismatic Guaranty Corporation® (NGC®) has announced a new certification and encapsulation service for coin, token and medal dies. As many numismatists know, dies are the tools used in the minting process to strike a planchet and impart the coin's design.

After their useful life is over, dies are usually destroyed by a mint. Sometimes, however, they are cancelled and sold as a numismatic product

or scrap. These cancelled dies are defaced to prevent them from being used to illegitimately strike more coins. Dies that have not been fully defaced and still show part of the coin's design are particularly desirable to collectors.

In rare cases, a die may be inadvertently released by a mint without any defacement or cancellation. These dies, which show the coin's full design, are highly prized by collectors.

NGC NOW CERTIFIES AND ENCAPSULATES CANCELLED DIES

NGC divides its certification of dies into five categories:

1. Cancelled – Defaced

NGC Certification Fee: \$20

Defaced dies have had their designs completely removed. While the design has been destroyed, it is usually possible to determine the denomination of the die by the diameter of the face and markings on the shaft or base.

Fully defaced dies from the US Mint are relatively easy to find today as many were sold to collectors in the late 1990s and early 2000s along with a coin struck by the die and a certificate of authenticity (COA). In order for NGC to attribute such a die by date and design, the die must be submitted to NGC with the US Mint's original COA, which includes the die number (found on the die) and type of coin struck.

(1994-D) Quarter Die - Defaced.

NGC NOW CERTIFIES AND ENCAPSULATES CANCELLED DIES

2. Cancelled – Torched

NGC Certification Fee: \$20 Fee

The majority of the face of a torched die has been melted, leaving only tiny areas of the design visible (if any). The diameter of the face of the die and/or its markings can be used to help identify the denomination it once struck. Most examples are from the San Francisco Mint in 1968 (most were proofs). After the design area was melted by a blowtorch, the dies were sold as scrap by the General Services Administration. Fortunately, many were saved.

(1967-74) Philippines 10 Sentimos Obverse Die – Torch Cancelled.

NGC NOW CERTIFIES AND ENCAPSULATES CANCELLED DIES

3. Cancelled – “X”

NGC Certification Fee: \$50

An “X” has been ground into the face of the die, leaving the majority of the design visible. This type of cancelled die is very popular since most of the design can still be seen. The most commonly seen examples of “X” cancelled dies are late 1990s commemorative dies, one of which is pictured below.

1996 Olympics – Tennis Silver Dollar Die – X-Cancelled.

NGC NOW CERTIFIES AND ENCAPSULATES CANCELLED DIES

4. Cancelled

NGC Certification Fee: \$20

The generic “Cancelled” category includes all other types of cancellation used by mints. This includes partially defaced dies, such as the Mercury Dime obverse die pictured below.

1935 Mercury Dime Obverse Die – Partially Defaced.

NGC NOW CERTIFIES AND ENCAPSULATES CANCELLED DIES

5. Uncancelled

NGC Certification Fee: \$100

These dies have no evidence of cancellation. These are the rarest type of die, as they are seldom released. However, this 1967 Philippines 10 Sentimos Obverse Die, pictured below, is an example.

1967 Philippines 10 Sentimos Obverse Die – Uncancelled.

NGC NOW CERTIFIES AND ENCAPSULATES CANCELLED DIES

Fred Weinberg, an error coin expert and dealer in dies, sees great value in this new program. “NGC has invented a solution to market the quantity of official US Mint defaced coin dies that I own,” he said. “Now, instead of just looking like a nice paperweight, the NGC encapsulation helps display all sides of the dies and includes the NGC Label with a full description of the enclosed die.”

Dies submitted to NGC for certification will be encapsulated in NGC’s clear, tube-shaped holders. Comprised of high-quality, inert materials, these holders are designed for long-term preservation and superior display. Each holder is ultrasonically welded with an internal label that features a description of the die as well as a unique NGC certification number.

NGC’s holder (which is included in the certification fees listed above) can accommodate dies that are up to 40.6mm wide and 59.6mm

tall. Dies that are too large to be encapsulated can receive an NGC Photo Certificate, which features high-resolution photographs of the die along with a description and unique NGC certification number.

Dies from all countries are eligible for this new program at the same prices listed above. To submit, use a standard NGC Submission Form and write the category of cancellation in bold letters at the top of the form. Submit each category on a separate form and do not mix coins with dies on the same form.

Counterfeit or altered dies will not be encapsulated and the full grading fee will apply. For dies that are of questionable authenticity or that otherwise cannot be certified, the grading fee will be refunded less a \$5 handling fee.

Questions? Contact NGC Customer Service at 1-800-NGC-COIN (642-2646) or Service@NGCcoin.com.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

PRICES REALIZED IN THE APRIL 2019 CENTRAL STATES HERITAGE AUCTION

*The following mint errors sold in the April 2019 Central States (CSNS)
US Coins Signature Auction - Chicago #1294*

1979 50C Kennedy Half Dollar -- Struck on a Susan B. Anthony Dollar Planchet -- MS65 PCGS

Sold for: \$1,800.00

**1979 50C Kennedy Half Dollar -- Struck on a Susan B. Anthony Dollar Planchet -- MS65
PCGS.**

1959-D Lincoln Cent -- Struck on a Dime Blank -- MS64 PCGS

Sold for: \$1,800.00

1959-D Lincoln Cent -- Struck on a Dime Blank -- MS64 PCGS. 2.4 gm. This 90% silver first-year Memorial Reverse cent displays blushes of cherry-red, orange-gold, and forest-green toning, though a majority of the coin is brilliant. The high points show softness, as expected given the slightly smaller dime flan. Struck aligned with the collar die at 4 o'clock, where the rim is raised and complete. Portions of IN GOD WE and UNITED are off the flan, as is the L in LIBERTY.

**1996 Cent -- Struck on a 1996-P Dime, Double Denomination
MS67 NGC**

Sold for: \$1,140.00

1996 Cent -- Struck on a 1996-P Dime, Double Denomination -- MS67 NGC.

**1925 Medal Norse Medal, Thin Planchet
Top of Obverse Double Struck -- MS64 PCGS**

Sold for: \$576.00

1925 Medal Norse Medal, Thin Planchet -- Top of Obverse Double Struck -- MS64 PCGS.

**1917 G\$1 McKinley Gold Dollar -- Laminated Planchet, Reverse --
MS65 PCGS**

Sold for: \$504.00

1917 G\$1 McKinley Gold Dollar -- Laminated Planchet, Reverse -- MS65 PCGS. Sparkling rose and lilac patina covers each side of this lovely Gem gold dollar. A comparatively long planchet lamination runs along the top of the reverse from the R in BIRTHPLACE to the bottom of the flagpole. Mint errors on gold commemorative coins are very rare.

Mint Error News Price Guide

- Updated June 2019 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated June 2019)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors

Broadstrikes (Updated June 2019)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Mint Error News Price Guide

Partial Collars (Updated June 2019)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated June 2019)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins (Updated June 2019)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Struck Fragments

(Updated June 2019)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000
Lincoln Cent Memorial	\$75	\$125
3 Cent Nickel	\$3,000	\$3,500

Mated Pairs (Updated June 2019)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps
Lincoln Cent Wheat Ears	\$3,500	\$4,500	\$7,500	–

Transitional Errors (Updated June 2019)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

U.S. Gold Errors (Updated June 2019)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$1,000	\$5,000	\$2,000	\$10,000	\$25,000

Indents (Updated June 2019)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated June 2019)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated June 2019)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated June 2019)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated June 2019)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated June 2019)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated June 2019)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

Mint Error News Price Guide

Off-Metals (Updated June 2019)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

Mint Error News Price Guide

Counterbrockages

(Updated June 2019)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Mint Error News Price Guide

Fold-Over Strikes (Updated June 2019)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500

Martha Washington Test Pieces (Updated June 2019)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

MINTERRORNEWS GLOSSARY

1857 Paquet Half Dollar Uniface Die Trial

What are Uniface Die Trials?

Uniface Die Trials are deliberate, one sided impressions using either the obverse or reverse die. These Die Trials can be from finished or unfinished dies. Sometimes hubs are used, rather than the actual finished die. Metals other than the adopted composition are frequently used to strike Uniface Die Trials.

Above is a unique 1857 U.S. Half Dollar Uniface Die Trial in white metal. It is designed by Paquet, who created many of the patterns during that time period for the U.S. Mint. This design shows an eagle with a ribbon in its mouth with 13 stars above, and the denomination "Half Dollar" below. This is a fascinating piece of Numismatic History because it is an unfinished die trial. It is uniface (being struck by only one die on one side) on white metal which was not adopted as an official composition by the U.S. Mint.
